#### How Best to Order and Remit.

Remittances should be made either in the form of an Express Money Order or a P. O. Money Order, Bank Draft or Register-

Customers can also shop by express, as all express companies have purchasing departments in all their offices. If you wish to have purchasing departments in all their offices. If you wish to order goods from us to be sent by express, ask for a Purchasing Order Blank at any express office, and it will be supplied and forwarded without charge, other than usual rates for returning goods.

If goods are wanted C. O. D., 25 per cent. of the amount must accompany the order.

Orders from unknown correspondents, without remittance, should be accompanied by New York City references, to save delay.

About Packing and Shipping and no charge made. We make no charge for packing excepting for cloth bags, and no charge for cartage or delivery of goods to any shipping office in New York City.

Safe arrival assured. We guarantee the safe arrival of all plauts sent by express. Should anything be injured in transit, notify us at once and send us a list of what has been damaged, so that we can replace them without delay. But when they arrive in good condition, and if from inattention or other causes they fall, we cannot replace them. Plants sent other than by express are we cannot replace them. Plants sent other than by express are entirely at the risk of the purchaser.

Reduced Express Rates. We have secured for our customers from the railroad express companies a special rate on plants from New York, which is twenty per cent. less than regular merchan-

The term "Bulbs," as popularly understood, designates a class The term "Bulbs," as popularly understood, designates a class of flowering and ornamental-leaved plants in their dormaint condition, the flowers, foliage and roots having completed their growth, ripened off and died away, leaving a thickened, fleshy, bulbous root, tuber, corm, rhizome or pip, as the various types of bulbs are botanically named, but in all of which there were formed after flowering and before maturity, a bud or buds containing new sets of flowers, stems, leaves, etc., which are protected and sustained within the succulent bulb by the reserve food and energy collected and stored therein by the plant before reserve food and energy collected and stored therein by the plant before ripening for its successors' requirements during the next growing and flowering period. It is during this dormant state of rest, lasting, approximately, for from three to six months, that bulbs are taken out of the ground—sold, shipped and replanted, like so many potatoes—after which, conditions being congenial, the incipient plant and flowers develop with as much perfection as if the bulb had remained in its original environment. original environment.

Bulbous Flowering Plants (Bulbs) produce remarkably beautiful flowers, unsurpassed in many varieties by any other plants in the floral kingdom, and, besides, many of them are delightfully fragrant. There is a peculiar charm in growing bulbous plants; they comprise such an endless variety in habit, form, size, color, and are adaptable for so many purposes; many of them flower equally well under either garden or house culture, and after their beauty fades they hide away, or may be removed, until the proper time arrives for them to again burst forth with a new life of beauty, verdure and fragrance. In the interval their positions may be occupied by other seasonable flowering plants. Among other merits of bulbs is the certainty and perfection with which they bloom and their ease of culture.

Hardy Bulbs for Open Ground Planting .- A great many Hardy Bulbs for Open Ground Planting.—A great many kinds of bulbs are hardy enough to withstand our severe Northern winters. Most of the suitable sorts should be planted in the fall, and they will flower the following season, commencing in March or earlier with Snowdrops, Chionodoxas, Scillas, Crocus, Aconites, Bulbocodiums, etc., which are followed in April with Hyacinths, Tulips, Daffodils, and hosts of other bulbous beauties. In May appear late Tulips, late Narcisses, Lily-of-the-valley, Bleeding Hearts, etc. Again, followed in succession until frost, notably with Paronias, Iris, Hemerocallis, Lilies, Monthretias, Tritomas, etc.

For Geometrical or "Design" Bedding .- The bulbs best adapted are Dutch Hyacinths and Tulips, and while the dainty blendings and variegations of colors of many varieties of these are very beautiful, yet in this style of bedding the individualities are lost and the effect is apt to be a jumble. The happiest effects are produced by planting solid bright colors in contrast, and in ordering the varieties it is important to select those that will bloom at the same time and are of proper heights.

The Mixed Flower Garden and Herbaceous Border are favorite places for growing most hardy bulbs, and where they seem to thrive and give the most pleasure. They should be planted here and there in little colonies among the hardy plants and shrubs, whose sombre winter browns and dull greens make a most effective setting when studded in the early spring with the brilliantly colored and frawhen studged if the early spring with the ordinancy colored and raggrant bulbous blossoms. Besides from the border one does not hesitate to gather flowers daily for the house, for fear of spoiling the effect, as would be the case from design beds. And besides, "bulbs seem to do be; ter and last longer in a border," as a lady enstoner expressed it, and this is partially true, and thus accounted for: The flowers are freely cut in bud or approaching their prime, which is the best possible time for the future benefit of the bulb, for the efforts of bulbs to seed are weakplag; in fact, a Hyacinth that matures seeds virtually destroys its bulb. Furthermore, in an herbaceous border bulbs are not disturbed, the foliage remains uninjured until ripe, thus fulfilling its duty assigned by nature of recharging the built with new flowers, foliage and energy for the next season's display, whereas in beds for temporary effect builts are not often allowed to mature properly, the bed being required too soon for other seasonable plants.

Bold, Isolated Clumps of Tall-growing Bulbous Plants make a brilliant show planted on the lawn in a position not too prominent nor too near, the object desired being a large mass of one color, in striking contrast to the surrounding green grass and trees. For effects of this kind only one variety should be used in a bed. Those most suitable are indicated in the index by an (U)

Bulbs Right in the Sod on the Lawn present a pleasing picture when in bloom in the early spring. They should be planted in a "hit and-miss" fashion, an irregular group in one place, scattered individuals over there, as one would find wild flowers. Of course, on closely-clipped lawns, only very early spring-flowering bulbs can be used, those that flower, ripen and die down before it is necessary to use the mower. Then the summer surface of the lawn will be as smooth and green as if no sleeping bulbous beauties were beneath it waiting for their awakening the next spring. The bulbs may be planted with a dibble when the sod is moist and soft after fall rains, but it is better to cut the sod, turn it back, plant the bulbs and press the sod in place. Suitable sorts are indicated in the index by an  $(\mathcal{I})$ 

"Naturalizing" Hardy Bulbs in parks, semi-wild outlying grounds, etc., is coming much in vogue, and is a happy style of simulating nature. Such bulbs should be used as can be planted in quantation of the contraction of the tity, from a dozen to a hundred of a kind in a patch. Fortunately, among bulbous plants, we have many that are hardy, thrive and increase in such rough, neglected, picturesque places even better than in the prim garden. Those suitable are indicated in the index by an (Q)

#### BULBS FOR FLOWERING IN THE HOUSE AND GREENHOUSE.

There is no class of plants that gives more satisfaction for this purpose than bulbous plants (bulbs), and with so little skill gives such magnificent results. Perhaps the most important class of all bulbs for winter flowering and forcing are certain hardy and half-hardy kinds; they are the most easily managed of all, and need occupy no space in the window or greenhouse excepting when in bud and bloom. Under suitable treatment they flower with great certainty, and their flowering period may be hastened (forced) or retarded at pleasure so as to "bring them in" for certain occasions, or to give a continuous succession of bloom. There is a great variety of kinds of bulbs to select from for this purpose. See sorts marked (\*) in index.

#### FLOWERING BULBS IN GLASSES, BOWLS, UNIQUE POTS, ETC.

There are several curious and pretty methods of flowering certain There are several curious and pretty methods of flowering certain bulbs besides in ordinary pots and pans. One of the most successful and interesting are Hyacinth bulbs in glasses of water. Use early flowering single varieties only. We supply special "Hyacinth Glasses" for the purpose (see page 70). These are simply filled with fresh pure water; a lump of charcoal thrown in absorbs impurities, but is not absolutely necessary. The bulb sets in a cup-shaped receptacle on too of the glass. In filling, the water should not quite touch the bottom of of the glass. In filing, the water should not quite touch the bottom of the bulb. Place in a cool, dark, airy place until the roots have reached the bottom of the glass, which should be in about six weeks' time. Do not place them in a close, warm closet; they must have fresh air. As the water evaporates fill up the glasses and change the water entirely when needed to keep it sweet and clear. After rooting, place the glasses in a light storeroom where the temperature averages about 50 degrees with the compact of these have developed, then symptom to degrees until the stems and foliage have developed, then remove to a warm sunny window for flowers to open.

warm sunny window for flowers to open.

There are other kinds of bulbs that do equally well when rooted in water, providing the largest healthy bulbs are chosen. Notably, Amaryllis formosissima, Narcissus Horsfieldl and Golden Spur, Polyanthus Narcissus, Grand Monarque and Gloriosa, large bulbs of Roman Hyacinths, Early Single Tulips and Mammoth Yellow Crocus, etc. The so-called "Chinese Sacred Lily," a variety of Polyanthus Narcissus, grows and flowers luxuriantly in bowls of water, provided they are not placed in a dry furnace-heated room, which will cause the buds to blast before opening. Sufficient pebbles or shells should surround the bulst

placed in a dry furnace-heated room, which will cause the buds to blast before opening. Sufficient pebbles or shells should surround the bulbs to prevent them from toppling over.

Crocus, Roman Hyacinths and Lily of the Valley pips are very pretty when nicely flowered in columnary hedgehog or beehive-shaped nots with holes through them (see page 70). A bulb is placed in front of each hole with the crown of the bulb in it; the pot is then filled in with the soil through the large opening in the bottom, moss being pressed in last to hold the contents in place. After which the pots are put outside for the bulbs to root, as explained under "Cultural Instructions for Winter Flowering Bulbs," on page 3.

#### ULTURAL INSTRUCTIONS

#### HARDY BULBS

OPEN GROUND.

The soil for most hardy bulbs should be sandy loam. If it is stiff clay mix in sand and leaf mold. The texture of the soil should be such that it will not retain stagnant water. Well-rotted stable manure should be dug in deeply and should be placed where the long feeding roots can get at it and yet not come in contact with the bulbs. This is easily accomplished, and pays for the extra trouble if six inches of the top soil is first removed. Then apply the manure and dig it in thoroughly; level off; then put on an inch of sand; set the bulbs on it; then replace the top soil. Bulbs planted in this manner can be placed in their exact positions, and being of an even depth will flower more uniformly. The sand allows the water to drain away from the bulbs, an advantage in design bedding, and prevents manure from touching them, either of which may cause dormant bulbs to decay.

Where it is impracticable to prepare the beds as just advised then it is safer to use bone meal in place of stable manure. Most bulbs like rich food if properly applied, and although their flowers were formed the previous season, yet their development, size, luxuriance and brilliancy this season depend largely upon the nutrition the roots are consuming. Liberal applications of manure water when the bulbs are in bud often produce magnificent results.

The proper depth to plant bulbs: it is a common fault to plant too shallow. Hardy bulbs throw out their roots during the fall and early winter, and if planted too near the surface the freezing, thawing and heaving of the upper crust of the soil in mild winters often cause the bulbs to break from their roots and produce only inferior flowers in consequence. Lilies should be planted 8 to 12 inches deep; Hyacinths, Tulips, Narcissus and similar large bulbs from 5 to 6 inches deep; Crocus, Scillas and similar bulbs 3 to 4 inches deep. When the weather is cold enough to freeze a crust on the soil then cover the beds with leaves, straw or marsh hay to a depth of from 4 to 6 inches. This proteets not only from severe freezing, but from equally injurious unseasonable thaws. Do not put this covering on too early, for the warmth might cause the leaves and flowers in the bulbs to start, and afterward to be injured from freezing. Remove the covering in the spring gradually.

The proper time to plant hardy bulbs in the open ground is from 4 to 6 weeks before regular freezing nights, cool weather being necessary to deter top growth, which is liable to start after 4 to 6 weeks of root development. This brings the planting season for such hardy bulbs as Hyacinths, Tulips, Narcissus, etc., in September in latitude of Maine, Ontario, Wisconsin, etc.; in latitude of New Jersey, Pennsylvania, Ohio, etc., plant in October; in latitude of Virginia, Kentucky, Missouri, etc., November is early enough. South of that do not plant before December, unless you wish to risk the occasional freezing weather in January and February, which usually catches early-planted bulbs in full wealth of foliage and bud, destroying them, though in this section very earlyflowering bulbs, such as Roman Hyacinths, Duc Van Thol Tulips, Paper White Narcissus, etc., if planted in September, will usually be through flowering before freezing weather.

#### **ULTURAL** INSTRUCTIONS

FOR

#### Winter-flowering Bulbs.

One of the most important essentials—we might say the secret of success One of the most important essentials—we might say the secret of success in flowering bulbs in the house or greenhouse—is perfect root development before the tops commence to grow. To aid the uninitiated in this important matter, we will illustrate: When hardy bulbs are planted in the open ground in Northern States, by the time the bulbs show signs of growth the weather above them is cool or cold, the ground beneath them is warmer, the conditions are congenial for root action and deterrent to top growth, results perfection in development of such flowers as the bulbs contained. A bulb does not seem to care which end starts into growth first, and when it is not under natural conditions, it usually chooses the wrong end, the top, so when we grow them under artificial conditions, to be successful, we must overcome their unfortunate tendency and make them produce roots first. The failures to do this are responsible for nine-tenths of the disamointments. for nine-tenths of the disappointments.

When hardy bulbs are to be grown in pots or winter blooming the bulbs should be potted as soon as they are procurable, between August and November.

The soil used should be rich loam; no fresh manure can be used, though if

November.

The soil used should be rich loam; no fresh manure can be used, though if thoroughly rotted, some may be pulverized and worked through, but it is safer to use in place pure bone meal, one part to lifty of soil. If the soil is stiff and heavy mix it with sand and leaf moid or peat. The size of pots required depends upon the kinds of bulbs. A five-inch pot is best for a first sized named Hyacinth, similar large bulbs require the same size pot. Tulps and bulbs of a similar size, while they can go individually in a four-inch pot, yet it is better to put three or more bulbs of one variety in a larger pot, as the soil retains a more even temperature and moisture. For this reason some people prefer earthen bulb pans, which come in various sizes, from eight to elighteen inches in diameter. In potting, place a little broken pottery or lumps of charcoal in the bottom for drainage, then fill the pot with soil and shake it down, but do not pack it; neither must the bulb be pressed or screwed into the soil, which packs the soil under it so when the roots start they often raise the bulb out of the pot.

Where more than one bulb is planted in the same pot, pan or box, if they are not all of one variety, care should be used in selecting different varieties that will flower at the same time. An early-flowering Duc Van Thol Tulb; and double Tournesol would flower a month apart under same treatment. Some varieties of Hyacintas, Narcissus and varieties of most species of bulbs vary greatly in time of bilooming, which, of course, would spoil the effect.

The tops of the bulbs texcepting Lilies are kept about even with the top of the soil. Do not water them unless the soil is very dry, for bulbs in a dormant condition resent an excess of moisture. After the bulbs are potted, as described, they should then be placed in a coid frame or coid pit to root. This is the most important detail in flowering bulbs under artificial conditions. Cover the potts, boxes or pans with four inches of sand, ashes, rotted leaves, tambark or s

earth is filled in, working it among the pots, filling up the trench, rounding over. No further attention is then required. Everything is congenial to perfect root development, while it is cool enough above to check top growth. When the weather gets cold enough to freeze a crust on the soil then an additional covering of about four inches of rough stable manure, leaves or straw is put over. Some early builts, such as Roman Hyacinths, Paper White Narcissus, Duc Van Thol Tulips, etc., will root sufficiently in five or six weeks to be taken up for first flowers, which should be out by Christmas or earlier, but it is safer to allow all bulbs not less than eight weeks for rooting. Every two weeks after the first removal of pots, or as needed, further relays of rooted bulbs may be taken out for a continuous-display of bloom.

When the note of bardy bulbs have been taken up blees there is a read-

When the pots of hardy bulbs have been taken up place them in a coal greenhoise or cool, light storesoom where not over fifty degrees, which temperature will allow the flower stems and foliage to grow, and at the same time prevent the opening of the flowers until the stems have attained their proper height, after which the pots may be taken to a sunny warm window or wherever they are wanted to flower. Bulbs treated in this manner will produce perfect spikes of perfect flowers. A good rule to keep in mind in flowering hardy bulbs is 40 degrees for roots, 50 degrees for foliage and stems, 60 degrees for going billow.

The exceptions to the above advice are Liliums and Lily of the Valley. Lilium Harrisi and Lilium Longiflorum bulbs particularly, in addition to throwing out roots from the base of the bulbs, usually form roots from the new stem just above the bulb, and the plants and flowers derive much strength from these top roots. So, in potting Lily bulbs, it is best to put them down deep enough, so there will be sufficient soil above the bulbs after potting as advised above.

Winter-flowering Lily of the Valley forms no new roots, but the thick. When the pots of hardy bulbs have been taken up place them in a cool

Winter-flowering Lily of the Valley forms no new roots, but the thick, fleshy, fibrous old roots should be trimmed at the bottom, leaving them from two to three inches long. This allows them to absorb the abundant moisture with which they should be supplied while the flowers and foliage are developing. They flower just as well in sand or moss or anything that retains an even moisture and temperature, as they do in soil, but Lily of the Valley, for flowering in the house or greenhouse, does require freezing before it can be successfully brought into flower. Without it, many pips will "come blind" or produce malformed spikes, so it is just as well for amateurs to plant their pips an inch or two apart in pots or Lily puns and plunge them in the garden, as recommended above for other hardy builbs.

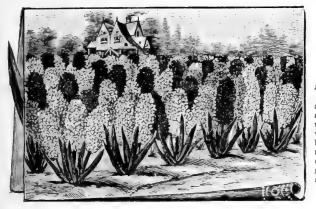

Half-Hardy Bulbs for Winter Flowering and Foreing should be tre the same as hardy bulbs, excepting that after potting, they should be placed for rooting where they will not freeze, yet they can go pretty close to it and be all the better for it. In Northern States a cold frame or pit or cold greenhouse to root them in is, therefore, almost indispensable.

The Culture of Tender Winter and Summer Flowering Bulbs differs from that of hardy and half-hardy sorts in its being necessary to always keep the bulbs of tender sorts, whether dormant or growing, in a warm situation. Seventy degrees is about as low a temperature as any of them will grow in, and it 80 degrees or over they usually give better results.

#### HENDERSON'S\_\_\_\_

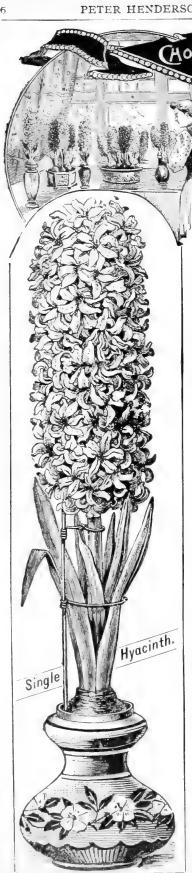

# Special Bedding and Forcing Hyacinths.

THE bulbs under this heading are of a much larger size than those put in ordinary mixtures; in fact, most of these average as large as those often sent out as "first size Named" by some dealers. They are of the same age as the first size Fancy Named Hyacinths offered by us on pages 6 and 7, from which they are the second selection. They will produce grand spikes of bloom, and the different sorts, as offered below, all being of one shade of color and all blooming at one time render them of great value for forcing or bedding out, especially in designs, enabling one to secure the exact color effect desired, which is a great advantage over mixed reds, mixed blues, etc., at but a slight advance in price.

3 bulbs of one variety supplied at the dozen rate; 25 at the 100 rate.

[ENDERSON'S Grand Named Hyacinths hardly need special praise, as every one knows them to be the most useful and popular of hardy bulbs, and universal favorites in the most extended application of the word. not only largely grown for forcing into flower during the dull, cheerless months of winter and early spring, but they are equally desirable for planting in beds or in the garden border. Hyacinths grown in glasses are elegant and suitable orna-ments for the parlor or sitting-room, and can be flowered in this way with very little trouble. The single varieties are more generally used for this purpose.

The varieties prefixed \* are the earliest flowering. Our Named Hyacinth

bulbs are the largest selected bulbs, not the second size so often sent out as the

best at a cheaper price.

#### JUST A FEW... OF THE MANY

#### Words of Praise

#### That Henderson's Hyacinths receive:

"The hyncinths I got from you last Fall were just grand! I have received bulls from different places, but I am compelled to say that yours take the lead. When I order bulbs my order goes to Peter Henderson & Co."

Mrs. M. J. HUMERICHOUSE, Richmond, Ohio

"My hyacinths received last Fall from you surpass any we have ever seen, and are the admiration of all."

Mrs. R. L. STANTON.

Red House Shoales, W. Va.

"The named hyacinths you sent me last season for forcing were grand.

Mrs. WM. N. PHILLIPS (Florist), Albauy, Oregon.

## THE "WATER COLLECTION" of HYACINTHS

YACINTHS grown in glasses are elegant and suitable ornaments for the parlor or sitting room, and can be flowered in this way with very little trouble. The following assortment, which we have designated the "Water Collection," is made up of exceptionally beautiful varieties, such as we have found to succeed well when grown in glasses

The bulbs should be placed in the glasses as early in the season as possible, keep ing them in a cool, dark airy cellar or similar situation until the roots have nearly reached the bottom of the glass, after which the lightest and sunniest cool situation that can be had is the best; the water in the glasses should be changed two or three Fill the glass with water, so the base of the bulb will only touch times a week.

the water.

#### SINGLES.

Bird of Paradise. Fine rich yellow, large compact

General Pelissier. Rich bright crimson scarlet. splendid spike; very early and a great favorite for forcing, the best early dark red.

X assortment of magnificent varieties, of distinct and superb shades A of color, all strong-growing, producing large and full spikes of bloom, and sure to give the greatest satisfaction for winter flowering in the conservatory or window garden.

Fill a 5 or 6 inch pot rather loosely to the brim with soil composed of loam, leaf mold and sand, fertilized with bone meal; place the bulb down so that it appears about even with the top of the soil. The pots should so that it appears about even with the top of the soil. The pots should then be plunged in a cold frame or in the garden, the top of the puts fully 4 inches below the surface of the ground, then cover with soil and leaves or litter to prevent freezing; this will encourage a strong growth of roots before the top starts. It must not be forgotten that a strong development of root can only be had at a low temperature, say from 40 to 50 degrees, and any attempt to force them to make roots quicker by placing them in a high temperature will certainly enfeeble the flower. They may be removed in succession as required, after six to girth weeks! time to a be removed in succession as required, after six to eight weeks' time, to a cool room for flowering.

Cavaignac. Rosy carmine, shaded salmon, beautiful large broad bells, large compact spike.

out, large broad truss.

Queen of the Blues. The finest light blue, very large bells and tall fine spike.

King of the Blacks. Magnificent purplish black, compact truss.

La Grandesse. This is one of the finest pure whites; grand compact spike, well furnished with very large bells.

King of Yellows. Deep pure yellow, grand truss; one of the best yellows in existence.

DOUBLES. Fine dark blue, Double Charles Dickens. Fine dark blue, shaded lilac, large double bells and extra large spike; the finest of the double dark blues.

La Grandeur. Bright golden yellow, with eltron-tinted centre, extra large and double bells, straight strong truss

Mad. Marmont. Unique color, white shaded azure, compact spike, extra fine bells.

Princess Louise. Superb deep red, large fine double bells and extra good spike.

Roh-I-Noor. Bright rose, large bells and well-

Koh-I-Noor. Bright rose, large bells and well-furnished spike, extra fine, early. Triumph Blandina. Peach-blossom pink, with

faint stripe of carmine, tall, well-rounded spike; a lovely variety.

WHITE ITALIAN HYACINTH.

#### WHITE ITALIAN HYAGINTHS.

The profusion of bloom, fragrance and graceful spikes render them very popular for cutting purposes. The bulbs are red-skinned and bloom a little later than White Romans, and, there-fore, are valuable for succession; also for garden planting for spring flowers. (See prices above.)

#### PAN (Boman) HYAGINTHS.

The Hollanders practice this method of growing Hyacinths for winter flowering in the house, with most satisfactory results: 10 to 12 bulbs are planted in earthern pans, 8 or 9 inches across. Several of these pans can be filled and put away to root in the usual manner, and by bringing them in at intervals a beautiful display can be

enjoyed for weeks. (See cut.)

White, Pink, Crimson, Blue, Purple or Mixed Colors.

Price, 5c. each, 50c. per doz., delivered free in the U. S., or, purchaser paying transit, for 40c. doz., \$3.75 per 100.

PAN HYACINTHS.

#### MUSK HYAGINTHS.

Large Flowering.

A small-growing Hyncinth of a purplish color, emitting when in flower a strong and very agreeable musky odor. Valuable for pot culture, and well worth growing in clumps in the open

Price, 10c. each, \$1.00 per doz.

#### Feathered Hyacinths.

Exceedingly pretty, feathery, plumo-like spikes, averaging 9 to 12 inches high. Few plants are more striking in the garden or more useful for cutting

Price, 20c. per doz., \$1.25 per 100.

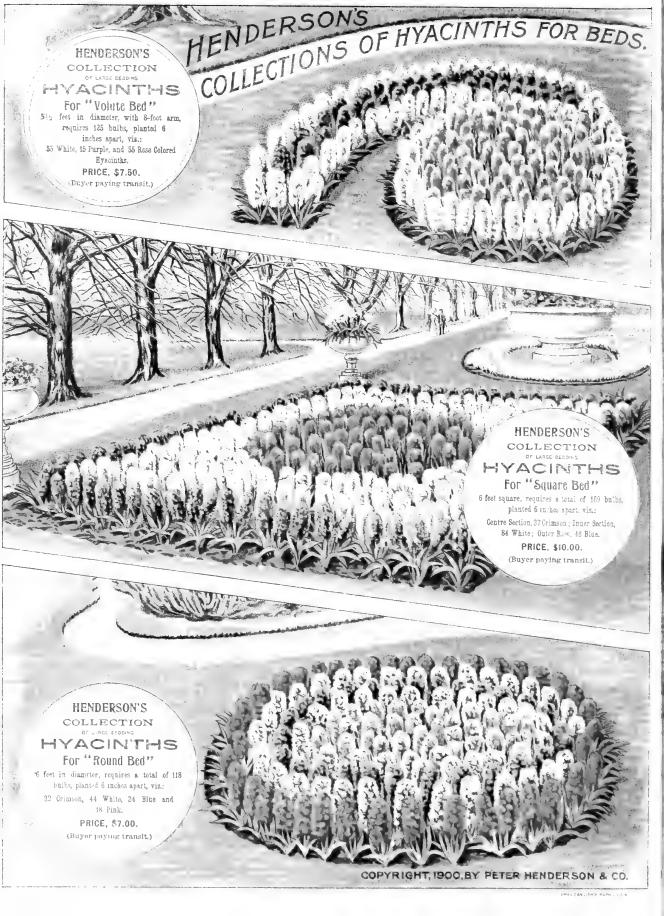

#### GRAPE HYAGINTHS.

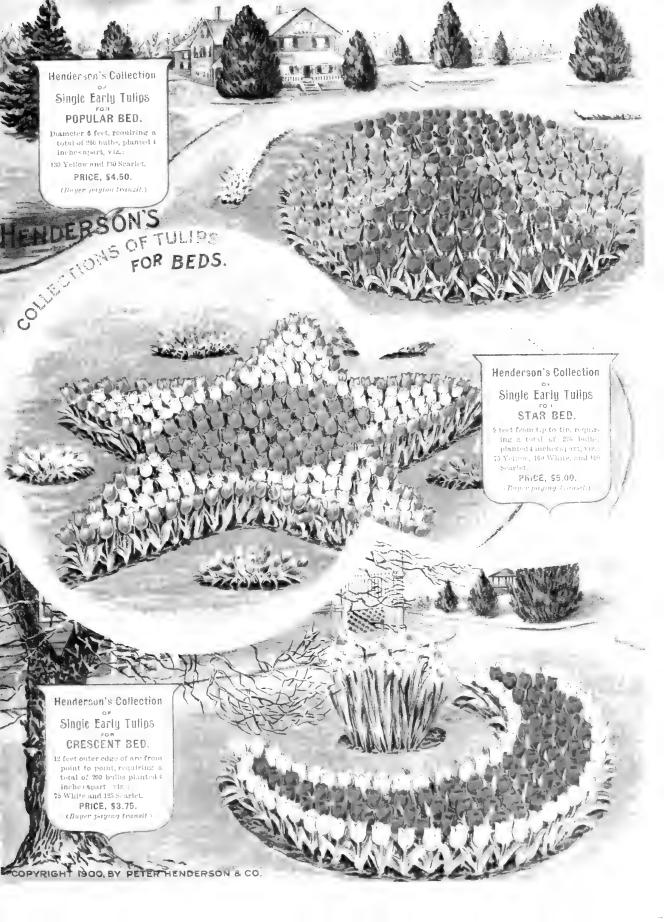

Very pretty, producing flowering spikes about 6 inches high, with little round bells so arranged as to resemble a bunch of grapes. Admirable for permanent beds and edgings and partially shaded situations, where they should be planted in groups of one dozen or more, where they will soon spread, and being perfectly hardy will take care of themselves. They are very care of themselves. They are very pretty when grown six in a pot in the house for winter flowering. (See cut.)

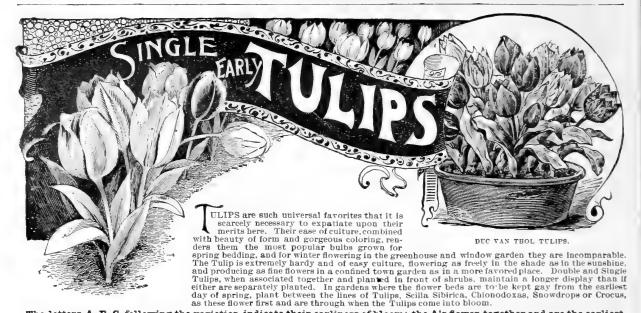

**Blue Grape**, 15c. per doz., 75c. per 100, \$6.00 per 1,000.

White Grape, 20c. per doz., \$1.00 per 100, \$7.50 per 1,000.

The letters A, B, C, following the varieties, indicate their earliness of bloom; the A's flower together and are the earliest, B's follow before the A's are out of bloom, etc. The average height in inches is also given to aid in arranging flower beds.

FEW

**GEMS** 

The Late or May-Flowering Garden Tulips

generally are in full flush of bloom about "Decoration Day." They din'er from the Early Single Tulips by their taller growth and later bloom; planted in conjunc-tion with the early-flowering Tulips, a gorgeous display of bloom gan be enjoyed until late in May. bloom can be enjoyed until late in May.

#### PARROT or DRAGON TULIPS.

These belong to the late or May-flowering Tulips, and have immense, attractive flowers of singular and picturesque forms and brilliant and varied colors. The petals are curiously fringed or cut, and the form of the flower, especially before it opens, resembles the neck of a Parrot. They form extravagantly showy flower beds, an endless variety of form and color, and should be grown in every though gradum in appreciation. nower garden in quantities.

White Pearl, True. (Lonis Le Grand.): Large, pure sating white flowers, exquisite...

Mixed Polyanthus Narcissus.....

The "Shui Sin Far," or Water Fairy Flower, Joss Flower, or Flower of the Gods, etc., as it is called by the Celestials, is a variety of Narcissus, bearing in lavish pro-fusion chaste flowers of silvery white, with golden-yellow cups. They are of exquisite

beauty and entrancing perfume. It is grown by the Chinese, according to their ancient customs, to herald the advent of their new year and as a symbol of good luck. The bulbs are grown by a method known only to themselves, whereby they attain great size and vitality, ensuring luxuriant growth and immense spikes of flowers; in fact, the incredibly short time required to bring bulbs into bloom (four to six weeks) after planting) is one of the wonders of nature. "You can almost see them grow," succeeding almost everywhere and with everybody. They do well in pots of earth, but sneceeding almost everywhere and with everyoddy. They do wenth potsol error, our are more novel and heautiful grown in shallow howls of water, with enough of fancy pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers throughout the winter. (Seecat.) Price, extra herse true China-grown bulbs, delivered free in U.S., 15c. each, \$1.50 per doz., or, buyer paying transit, 10c. each, \$1.15 per doz., \$8.00 per 100.

Some people think there are no such bulbs as HENDERSON'S BULBS!

"In the latter part of last November you sent me some bulbs which "In the latter part of last November you sent me some bulbs which I planted on the 5d day of December. Every bulb blossomed and such blossoms as are rately seen for size, I think. My lot is on a corner and so situated that all may see and admire and everyone comes and desires to know where I got such bulbs. Everything you have sent me has done well and I amouly too glad to let my neighbors know where they can do as well as I and I think at as reasonable a cost as such goods can be furnished any where."

Dr. L. W. DEAN, Waterville, N. Y.

"The bulbs which we bought from you created quite a ensation. I really believe every one of the 1.200 produced a flower, which was great satisfaction to me, and I think it was a great advertisement for you.

JOHN AUSTIN, Flint, Mich

"The bulbs sent me last year were a perfect success
Everyone admired the bed when in bloom. My orders
are small, simply because I have but little room. I wish
they were a hundred fold larger, for your bulbs and seeds
when we dive perfect anti-faction." always give perfect satisfaction."

Miss E. J. MEAD, Stamford, Conn.

#### MIXED NARCISSUS.

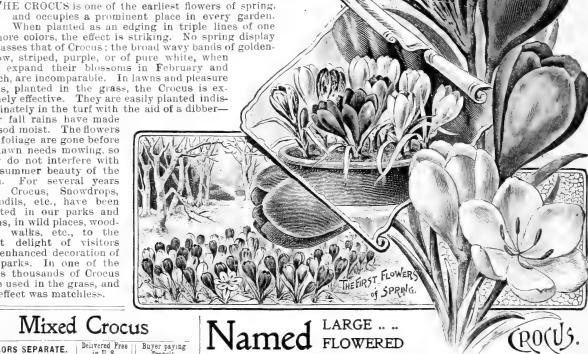

Plant liberally of these, so you an have plenty to cut for bouquets. They are cheap.

xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx

and occupies a prominent place in every garden. When planted as an edging in triple lines of one or more colors, the effect is striking. No spring display surpasses that of Crocus; the broad wavy bands of goldenyellow, striped, purple, or of pure white, when they expand their blossoms in February and March, are incomparable. In lawns and pleasure parks, planted in the grass, the Crocus is extremely effective. They are easily planted indiscriminately in the turf with the aid of a dibber-

after fall rains have made the sod moist. The flowers and foliage are gone before the lawn needs mowing, so they do not interfere with the summer beauty of the lawn. For several years past Crocus, Snowdrops, Daffodils, etc., have been planted in our parks and lawns, in wild places, woodland walks, etc., to the great delight of visitors and enhanced decoration of the parks. In one of the parks thousands of Crocus were used in the grass, and the effect was matchless.

#### LILIES.

II.IES are matchless amongst hardy plants for beauty of form and variety of color in the garden. They commence flowering in May, and with the various species maintain a continuous and unbroken succession of bloom until autumn. No class of plants, capable of being cultivated out-of-doors, possesses so many charms; their stately habit, rich and varied colored flowers, often deliciously fragrant, and easy culture, render them so distinct from all other hardy plants that no collection, however select, should be without a few of the choicer sorts. They are also excellent subjects for the shrubbery border, if planted in groups between hardy Azaleas, Rhododendrons, etc. the soil suitable for these plants being particularly adapted for the growth of many kinds of Lilles, more especially our native and California species. The best time to plant Lilles is in October and November. For general list of Lilles see pages 38 and 39.

THE

# TRUE BERMUDA EASTER LILY,

The Grandest Win-

rees s

316 mass 612

This Peerless Lily is the greatest acquisition to floriculture made in many years. The remarkably short time required to bring them into flower, and the certainty to produce a profusion of bloom, and also the ease with which they can be made to flower at any desired period, such as Christmas, Easter and other special occasions, render them invaluable.

- As a Garden Lily it is of great beauty, being entirely hardy, excepting in northern climates, where it requires a protection of leaves or litter to the depth of 5 or 6 inches.
- Full Cultural Instructions, telling how to force them into flower for Christmas or Easter—the treatment after flowering—about planting in the open garden, etc., Sent Free to every purchaser from this catalogue.
- The Flowers are delightfully fragrant, pure waxy white, of great substance, and if cut as soon as they are open, or partially open, they can be kept for two weeks.
- A Short Time only is Required to bring them into Bloom. Bulbs potted in August can be had in flower in November, if desired.
- A Succession of Bloom can be kept up from November to May by bringing the pots of bulbs in from cold frames at intervals throughout the winter.
- The Quantity of Bloom Produced is Marvelous; the average production of bulbs 5 to 7 inches incircumference, even when forced, is from 5 to 8 flowers, and of bulbs 7 to 9 inches, 8 to 12 flowers; and, if desired, a second crop of flowers, frequently equal to the first, can be secured the same season by drying the plants off after blooming for a time and then again starting them.
- Blooming Plants in Pots form typical Easter offerings and presents for decoration of the window, table, house or church. Nothing is more appropriately beautiful and highly appreciated Thousands upon thousands are sold in the large cities every winter for this purpose.

Monstrous Size Bulbs.

(9 to 11 inches in circumference.)

THE

# TRUE BERMUDA EASTER LILY

January States of the Easiest Culture, Blooming in Wonderful Abundance.

Our Bulbs are Larger, Healthier and Better than those usually sold—for the reason that no expense is spared in manuring and cultivating. Experience having shown us that bulbs so treated are incomparably superior to bulbs grown on impoverished and unfertilized land year after year, which constitutionally weakens the bulbs and they give results accordingly. This is the general practice—especially among those who endeaver to grow cheaply—to enable them to undersell.

#### What is Thought of Henderson's Bermuda Easter Lily Bulbs:

"I have been growing your Harrisii bulbs for several years. Last season I divided my order, pluring one-half with you and the other half with another prominent seedsman. Yours were the true Bermuda Harrisii while the others were badly mixed with a worthless variety which grew to enormous height with a very small flower. Your half were all of an even size with flowers of excellent quality. I had the honor of having the finest likes in Pittsburgh from your bulbs. There were but few of your plants diseased—probably 50 in the whole butch of 6.000 bulbs. You will have my full order next season."

Yours truly, WM. F. LAUCH, Florist, Carrick, Pa.

"The stock I got from you is doing much better than any I have had in the last three years, which were purchased elsewhere. Last year my bulbs turned out fully 40 per cent, worthless; the year before 30 per cent, and I changed purchasing place on that account every year. This season I got my bulbs from you, and I am very much pleased with them. They are as fine a lot of plants as any one could wish to see. Trusting you may be able to keep your stock as free from disease in the future as this lot has turned out, I remain,

Yours very respectfully, GEO, W. EMMANN, Florist, Newton, N. J.

AMORPHOPHALLUS. Rivieri. A very remarkable and showy plant, with enormous palm-like foliage sprending in the shape of an umbrella, the stem of deep green is marbied with brown and white; a desirable plant for specimens or groups on a lawn. The flowers are very large, of deep red, and are produced before the leaves appear. It is chiefly grown, however, for the luxuriant tropical effect of the foliage. It should be planted out in May (See cut.) (Ready in November.)

ANOMATHECA (SCARLET FREEZIA).

AMARYLLIS. Probably the most magnificent and gorgeous bulbous plant known. Their lmmense flowers, richness of coloring and regal habit are simply incomparable. They throw up spikes from 18 inches to 3 feet high, bearing enormous trumpet-shaped flowers, averaging 6 to 10 inches across, of great substance, some being of rich and glowing colors, others delicately shaded and superbly veined. For pot culture in the window, conservatory or greenhouse, they are well adapted, and when in bloom in the winter and spring country to the property of the property months, no flower can approach their beauty.

Johnsoni. (Bermuda Spice Lily.) A very popular variety, wine red, with a white stripe down each petal, an early and abundant bloomer and a specially robust grower. (See cut.).....

Aulica Platypetala. (Lily of the Palace.) Flowers large and extremely handsome, glowing crimson, tipped green. Splendid winter bloomer

**Defiance.** This is a gem, being a sturdy grower, flowering repeatedly during the season. Flowers extraordinarily large, of velvety carmine red, striped and flecked and suffused with white............

Vittata Hybrida. These are unnamed seedling hybrids, and will produce some new varieties of exceptional beauty. The colorings and markings are exquisite, the bulbs are very large, and are of sufficient strength and age to produce magnificent flowers during the winter or spring.....

Formosissima. (Jacobæan Lily.) A quaintly-shaped, beautiful flower of grand dark scarlet, free blooming; forces well and can be grown in water like Hyacinths; if the bulbs are kept dry during winter, they can be planted in the open ground in the spring and will flower during the summer ......

Belladonna Major. (Belladonna Lily.) Autumn-blooming variety of extreme beauty and fragrance, the spikes grow from 2 to 3 feet high, each carrying from 6 to a dozen beautiful flowers. "sweet as lilles," of silvery white, flushed and tipped with rose......

Equestris. (The Barbados Lily.) Bright light scarlet, with a white star-like throat, running out into bars in the centre of the petals; very free bloomer. (See cut.) ....

The collection of above 7 named Amaryllis, 1 bulb each, \$3.00.

For Amaryllis Atamasco, see "Zephyranthes," page 45. For A. Saruleusis, see "Nerine," page 41. For A. Luten, see "Sternbergia,"

ANOMATHECA. Cruenta. A charming plant for culture or for blooming out-of-doors, hardy south of Washington but requiring the protection of a cold frame in cold climates, their dwarf stature, brilliant and profuse bloom continued for a long period render them very popular, flowers brightrooy carmine, blotched with crimson, height of foot. (See cut.).

ANTHOLYZA. Very showy and stately with the appearance of Gladiolus. They are hardy south of Washington, and can be grown in cold sections in a cold frame, or they may be planted out in the spring, flowering from July to September; for grouping in beds or shrubberles, their brilliant long tubular flowers and tall spikes of bloom render them very effective, also fine for cut flowers. Mixed Colors .....

Cornutum, or Red Calla. A very handsome Arum with red flowers spotted with black; stems curiously mottled green and white; follage palm-like and very handsome; a showy pot plant for winter decoration ....

Sanctum, or Black Calla. The plant produces one large flower the shape of a Calla, but from 14 to 18 inches long and 4 Inches broad, and of a rich, dark purple color and green underneath. The spathe rising from the centre of the flower is about 10 liches long, velvet-like and quite black. The leaves are large and of a rich green color, and resemble those of the Calla Ethiopica. (See cut.) Large bulbs

BESSERA ELEGANS. Coral Drops. If stored during winter in a dry place and planted in the garden in the spring. It can be grown with perfect case; its umbels of bright coral-like flowers open in succession during fully two months of the late summer. The flowers are of vermillon red, variously marked with white on the inner surface; bright purple anthers. Height, 1 to 2 feet......

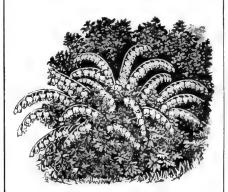

BLEEDING HEART. Dicentra or Dielytra. One of the most ornamental of spring-flowering plants, with elegant green foliage and long drooping racemes of heart-shaped flowers. This is deemed one of the fluest of all hardy garden plants, and is frequently forced for greenhouse or conservatory decoration. As it is perfectly hardy it only requires to be planted where it is to remain. If potted in November, left outside till it has formed new roots, and then brought into a gentie heat, it may be had in flower in the greenhouse in February and March. (Ready in November.) (See cut.)

Spectabilis. Magnificent racemes of pink and white flowers......
Cucullaria. Similar to the above, one of our most beautiful spring flowers; fern-like foliage and a profusion of white blossoms

blooming low-growing pla	Sanguinaria Canadensis A large flowering, improved Blood Root," a fine, hardy int for shady beds; handsom eight 6 inches. (See cut.)	, spring- [ e lenves,	!	1.00

CHIONODOXA GIGANTE

CYCLAMEN GIGANTEUM.

ERANTHIS, OR WINTER ACONITE.

CINNAMON VINE. Dioscorea Batatas. A beautiful rapid-growing summer climber, with bright green glossy foliage and spikes of deliciously cinnamon-scented white flowers. It is perfectly hardy, the stem dying down in winter, but growing with great rapidity in the spring, so as to cover any trellisor arbor very early in the season. Large Select Roots (ready in November)......

COOPERIA. Drummondi. These make excellent pot plants for winter flowering and force well, or the bulbs can be kept dry and be planted out in the garden in the spring, where a clump of them planted close together will bloom successively from May to September; the flowers are starshaped, pure white, flower half an inch across, with long tubes, expanding during the evening and emitting a delicious primrose-like cdor. (See cut.)

CROWN IMPERIALS. Well-known spring-border plants, with clusters of immense pendant bell-shaped flowers surmounted with a tuft of green leaves. They are very effective, and if left undisturbed for years they form gigantic and picturesque groups of gorgeous colors.

Golden Striped. (Folia Aurea Striata.) Rich green foliage striped with golden yellow; the bright red flowers are strikingly effective against the beautiful, variegated foliage. This variety is of much value for pot culture.

Mixed Colors

CYCLAMEN. **PERSIAN.** These are among the most flowering bulbs for the window and greenhouse. Not only are the flowers of striking beauty but the foliage is also highly ornamental, consequently they are very decorative even when not in bloom. There are no plants better adapted for pot culture, and few that produce such a profusion of bloom; the flowers range through many shades of pink, crimson, white, etc., some being beautifully spotted. Most of them are moreover delicately fragrant. (See cut.)

ERANTHIS. HYEMALIS. Winter Aconite. Early in spring the golden blossoms of the Winter Aconite look charming, resting on an emerald green cushion of leaves and torning a striking contrast to the pure white Snowdrop, Spring Snowflake, and the lovely blue Scillas and Chionodoxa. The foliage remains long after the flowers, making the plant especially valuable in moist situations such as under trees, which the Winter Aconite enjoys, and where few other flowering plants will thrive. 8 to 8 inches high. (See cut.)

EREMURUS. Majestic, tuberous rooted plants, natives of Turkestan and the Himalayas, where they are subjected to severe winters. They are moble ornaments in a large flower garden or on the lawn. The individual flowers—as large as a sliver half-dollar—are closely arranged on stately spikes 6 to 10 feet high, forming a magnificent column of bloom during June and July. Eremurithrive in almost any kind of soil, but prefer a moist, deep, rich sandy loam, with free thrive in almost any kind of soil, but prefer a moist, deep, rich sandy loam, with free run for their large, fleshy roots, which extend out several feet. Give them a sunny position, sheltered from gales; plant the tubers in the fall, while dormant, and set about 8 inches deep. Although they are considered hardy, it will be safer in Northern States to protect with 4 or 6 inches of leaves, strong manure or similar covering, to prevent the young growth, which starts very early, from being tipped from late freezes. We offer only strong, six-year-old flowering roots, as Eremurl seldom flower until that age. (See cut.) (Ready in November.)

\*\*Himzleins\*\* Snow, white flowers with yellow anthers: beight, 6 to 8 feet. Price.

E. Himalaicus. Snow-white flowers, with yellow anthers; height, 6 to 8 feet. Price, \$3.00 each, buyer paying expressage.

E. Robustus. Peach pink flowers, very fragrant; height, 8 to 10 ft. Price, \$5.00 each, buyer paying expressage.

RYTHRONIUM. Giant Dog's Tooth Violet. Beautiful plants, perfectly hardy, the foliage is usually charmingly variegated, and a mass of 15 or Delivered Free in U. S. 20 plants is a pretty sight even when not in flower, but when the graceful flowers are in bloom the effect is matchless. The plants luxuriate in rather moist, partially shady positions and do very mottled dark brown.

Hendersonii. (New.) Large flowers of heliotrope or lilac colo with a purple centre surrounded by a narrow, yellow ring; one

EREMURUS

GLOXINIA.

Outline, and bold luxuriant foliage, render them exceedingly attractive for large effective clumps, succeeding in sunny positions and equally well in shady places where many plants would not exist. They are also much grown in Europe for greenhouse decoration in winter. (Ready in November.) (See cut.)

Subcordata Grandiflora. (White Plantain Day Lily.) Very showy, splendid milky white flowers, nearly 4 inches long; very Sieboldi Varieres. FUNKIAS.

Sieboldi Variegata. A noble fall-blooming plant, foliage very handsome lively green and variegated with white; fic wers purplish lilae.....

GESNERA. Greenhouse tuberous-rooted plants, remarkable for the beauty of their foliage, which is singularly marked and soft as velvet, and also for their spikes of brilliantly colored flowers, mostly scarlet and yellow. For a contimous succession of bloom, the plants should be started at different times. Those started into growth in spring or summer first will come into bloom by the end of September, and the others will follow in succession through winter and spring. Mixed Varieties .....

GLADIOLUS. Early Flowering Hardy. (For Antumn planting or Winter forcing.) These beautiful Early-flowering Gladiolus are greatly prized on account of their blooming in June and July, if planted in the autumn in dry soil and protected with a covering of about six faches of straw, leaves or litter. If planted in cold frames they will flower as early as May, and this is perhaps the better way in very cold localities. These Gladiolus are also invaluable for flowering in the greenhouse for winter bloom. The flowers are smaller and more refined than those of the Gandavensis Gladiolus; the colors and markines fare term bunds me; the bulbs can be kent dormand.

more refined than those of the Gandavensis Gladiolus; the colors and markings are very handsome; the bulbs can be kept dormant until spring fand hen be planted in open ground if preferred. (Ready in November.) (See cut.)

Blushing Bride (Relicatissima). White with lovely pink and carmine fikkes on the lower petals.

Rosy Gem. Delicaterosy pink; invaluable for cutting.

The Bride (Covilii Alba). Beautiful; purest white flowers, set closely on the stem; most valuable for forcing for cut flowers.

Alexis. Rosy cream, beautifully flaked.

Gen'l Scott. White thiged sathy rose, very fine.

Prince of Orange. Furk orange pink, flaked white.

Sarnian Gem. Salmon, with white and crimson flakes.

Chas, MacIntosh. Scarlet, with violet flakes.

1 bilb each of above Shanned Gladiolus. 70c.; 3 each, \$2.00.

Mixed Early-flowering Hardy Gladiolus. Mixed Early-howering Hardy Gladiolus

GLOXINIAS. Most charming greenhouse plants, of dwarf across—are produced in greatest profusion, and are of the most exquisite and gorgeous colors; many of which are manificently spotted, mottled and blended. Under the commonest culture they bloom continuously for months, and by starting at intervals, a succession of their splendid flowers may be had nearly the whole year round. (See cnt.) (Ready in November.)

Mixed Varieties.

HELLEBORUS. Miger or Christmas Bose. Ing freely in almost any situation, flowering in great profusion in early spring, and if grown in the house, or in frames, will bloom from December all through the winter months. The flowers, two to three inches in diameter, are of pure white. (See cut 1), (Rondy in Voyamber) ent.) (Ready in November).....

HENDERSON'S CHRISTMAS FORCING LILY OF THE VALLEY.

FORTIN'S GIANT LILY OF THE VALLEY.

LACHENALIA

LYCORIS JAPONICA

LACHENALIAS. Beautifulearly spring flowering bulbs for conservatory and window garden decoration; the spotted foliage and spikes of brilliant flowers render them exceptionally striking. They are very easily grown, and can be had in bloom by Christmas if desired, or can be

grown in cold frames if protected from frost. (See cut.)

Nelsoni. A new hybrid; without doubt the finest of therace, producing its large golden yellow flowers in long racemes with wonderful freedom, lasting in flower in a cool house nearly two months.

Of the easiest culture; treated same as Hyacinths.....

endula. Very strong growing and handsome, flowers bright red

Pendula. Very strong growin tipped with green and yellow

Rubida. Deep red freely spotted, one of the first in bloom. Very distinct and showy .....

LILY OF THE VALLEY. The Lily of the Valmost useful and greatly admired plants grown; the modest bell-shaped flowers of purest white are highly prized for cutting ben-snaped nowers of purest write are highly prized for cutting purposes, and for flowering in pots in the winter they are exceedingly well adapted and will last several weeks in beauty. By taking them in at intervals a succession of flowers may be kept up all winter. They are also forced in immense quantities by florists, but they are the most charming when grown in large worther in partially when led localities are with the lower. patches, in partially shaded localities around the lawn, near the horders of streams, lakes, etc., being perfectly hardy. (Ready for delivery in November.)

only adapted for open ground planting and may not show much superiority the first spring after planting, but by the second sea-son, when it gets well established, it produces wonderfully luxuriant foliage and immense spikes crowded with purest white bells twice the size of any other sort. In every way it is superior...

Large Clumps of Lily of the Valley, for open ground plant-

LYCORIS. Japanese Hardy Amaryllis. These built-ous plants are of great beauty; they belong to the Amaryllis family and are consequently adapted to pot culture in the greenhouse or window garden. Coming from colder climates than the tropical Amaryllis, they thrive under cooler treatment. They make splendid garden plants, and this is the popular way of growing them in Japan and China. Grown outside they flower toward autumn. They have proved to be hardy

they nower toward autumn. They have proved to be hardy grown in a warm, sheltered sunny border, protected with a frame or mulching during the winter. (See cut.)

Squamigera. A very strong-growing and large-flowering variety, and perhaps the hardiest of the lot; it is frequently grown by the Chinese as a cemetery plant. The flower spikes are stout and solid, from 2 to 3 feet high, hearing umbels of from 5 to 7 large. llly-likeflowers about 4 inches in length, nearly twice the size of the other varieties. The color is a soft rosy pink, delicately tinged

with silvery gray.

Aures. Produces flower stems about 18 inches high, surmounted with from 12 to 18 deep yellow illy-like blossoms.

Japonica or Radiata. Flowerstems about a footlong with clusters of from 8 to 12 fiery red illy-like flowers about two inches across; colors very brillant, and in the smilight glisten as if sprinkled with sold dust the work. with gold dust; the wavy, recurved petals and long red stamens give a graceful effect to the flower. Perhaps no bulbs bloom with more certainty and swiftness after potting; for autumn and win-

SCHIZOSTYLIS. Coccinea. (Crimson Flagor Kuffir bulbous plant; the leaves are neat and gloosey, and the flowers are rooty scarlet, borne on tall spikes; the bulbs are usually planted out in spring, and in the autumn the plants are lifted, potted and brought into the conservatory, where it will bloom for months; splendld for cut flowers ..

SCILLAS. Amoena or Sibirica Præcox. Among ou profusion masses of exqubsite rich blue flowers almost before the snow has disappeared. If grown in masses, their flowers fairly carpet the ground; and if grown with Snowdrops and Crocuses for contrast, the effect is magnificent. Grown in pots they may be had in bloom from Christmus until April.

campanulata, Blue.

Campanulata, White.

Campanulata, Bose.

SNOWDROPS. In the early spring months there is nothing more beautiful than a sheet of the snowy graceful blossoms of the Snowdrop. Effects of sur passing beauty may be arranged with Snowdrops in the centre passing beauty may be arranged with Snowdrops in the centre edged with bright blue Seilla Sibiriea, or Chionodoxa Lucilie, or by Intermingling them. When practicable such plantings of the Snowdrop should be permanent. The Snowdrop and the Croem when planted in alternate circles are very effective and follow each other in bloom so closely that no gap is left in the succession Used as a permanent edging and in masses on the edges of lawns nestling in the grass, they are charming. (See cut.)

Single Snowdrops.

Immense for a Snowdrop, having sepals over an inch long an rather broad, pure white, with intense dark green inner divisions the flower stems are thick and upright, and fine for cutting; th bulbs are large. (See cut.) .

SPARAXIS. Exceedingly large and beautiful, bloom about two inches across, of the most telling the brightest shades of color, certain to please even the most fastidious; they are tigered, blotched, spot 

SPRING SNOWFLAKE. Leucojum Vernum. Produces flowers like
monster snowdrops; very graceful in growth, having the delicate
fragrance of the Violet. It is one of our earliest spring flowers
with white blossoms distinctly tipped green, handsome in outline
and prized for bouquets. They should be grown in quantities in
the borders or in spots on the edges of shrubbery, where they are
beautifully effective, and when established produce enormous quan-
tities of flowers. They can also be slowly forced in pots for winter

TRITOMAS. A stately genus of hardy tuberous plants, eminently effective for garden and lawn decoration, throwing up tall spikes of showy flowers during the late summer and autumn months. The new varieties are marvelous improvements over the old well-known "Red Hot Poker"

velous improvements over the on wen-known "kee Hot Foker plant. (See cut.) (Ready in November.)

T. Nobilis. The grandest of immense spikes of brilliant orange red flowers on stems 6 to 7 feet high.

T. Pfitzeri. A dwarf early, free-blooming sort; spikes of pure bright crimson, without a tinge of yellow or orange. 2 feet high.

TRITONIA. Exceedingly bright and free-blooming bulbous pot culture. A dozen roots in a ten-inch pot will in the autumn make a beautiful display. The bulbs should be grown in pots in a cold frame during winter, and they can either be brought in the conservatory towards spring for blooming, or can be transferred to the open ground in May for summer blooming, or the

bulbs can be kept dormant and planted out in Maylike Gladiolus, and then be lifted in autumn for winter blooming. Crocata. Mixed colors. Many beautiful sorts......

TROPÆOLUM. Beautiful and graceful climbing plants for the conservatory or window garden, producing in the early spring months richly colored flowers. 

Variegated Foliage. The leaves are bordered with white, making the plant very attractive even when not in bloom. Flowers arge, single

lbino. A new branching single variety, flowering thirty days earlier than the old single; throws from two to five flower stems from a single bulb, and these again are often branched; most valuable for cut flowers

TYDÆA. Very distinct plants of the Gesnera family, producing a long and brilliant succession of flowers of the most diverse shapes and gay-colored markings. They are valuable for winter flowering in a warm greenhouse or conserva-tory, as by starting them early or late they will bloom in any season, (See cut.)

VALLOTA. Purpures. (Scarborough Lily.) A valuable free summer and autumn bloomer, color rich red. It does well planted in the open ground in May, and when in bud can be potted and removed for conservatory or window decoration. It is one of the really good window plants. (See cut.)

WATSONIA. (Bugle Lily.) Summer-flowering bulbs, hardy south of Washington, and can be grown north with the protection of a cold frame, or the bulbs can be kept dormant and planted out in spring. Their long spikes of brilliant scarlet, plnk, white and purple flowers are very effective and most useful for cut flowers.

Mixed Varieties

ZEPHYRANTHES. Among our most beautiful dwarf bulbous plants, very effective for planting out in masses in May, flowering with great profusion durplanting out in masses any, movering writerest promoted dur-ing the summer. They are also most suitable for potculture; 6 to 12 bulbs clustered in a 6-inch pot in the autumn will give a fine display of bloom during the winter in the window garden or conservatory. 1 foot high. (See cut.) Atamasco.

Candida. Large white flowers ...... Rosea. Beautiful, large rose-colored flowers Sulphurea. Bright yellow ......

ZEPHYRANTHES ROSEA

LATANIA BORBONICA (For description and price see page 51.)

# Plants for Window Gardens. HARDY SHRUBS, HARDY ROSES,

Plants for Conservatories. Plants for Greenhouses.

Pages 46 to 57, inclusive.

A ChrysanthemumHov

STRAWBERRIES and GARDEN FRUITS. PALMS. We call particular attention to our list of PALMS (see

page 51, and venture to say that for the money expended there is nothing we offer which will give more satisfaction to our customers. They are especially grown for window and room culture, and with ordinary care can be kept in perfect condition for years. Our stock of Carnations, Primroses, Azaleas, Violets and other winterblooming plants is exceptionally fine, and contains only such varieties as are specially adapted for this purpose. In this connection we would say that the bariety of plants which will thrive and bloom during the winter months is comparatively limited, and the lack of success which occasionally discourages

amateurs is due more frequently to a poor selection of varieties than to mistakes in culture. With this point in view, we have carefully selected only such sorts as are adapted for this purpose, so that the most inexperienced amateur is perfectly safe in ordering from this catalogue, from the fact that it contains only such plants as are highly ornamental, either in flower or foliage, during the fall, winter and early spring months. We also offer a range of sizes in nearly everything, thus enabling customers to secure a large plant for immediate effect, or a small one at a low price, if desired.

## 🛪 About Forwarding Plants. 🛪

Unless otherwise ordered we send all plants by express (buyer to pay charges). Hardy shrubs, vines and hardy roses may be sent safely by freight, but unless the shipment is a large one express is cheaper, quicker and safer. Small lots of Geraniums. Fuchsias. Young Palms, Begonias. Ferns, Violets, Heliotropes and Primulas may be sent free by mail, if desired. WE GCARANTEE the safe arrival of all plants sent by express. If in good condition, when received, our responsibility ceases and if from inattention or other causes they fail and complaint is then made, we cannot replace them. Plants sent other than by express are entirely at the risk of the purchaser. Under the new ruling of the leading express companies, advocated and secured by us, plants packed in closed boxes will now be carried at a reduction of 20 per cent from the regular inerchandise rates.

Special Notice.—The offer of free delivery made on

Special Notice.—The offer of free delivery made on Seeds and Bulbs does not apply to plants except when sent by mail as noted above.

## Collections of Plants for House Culture.

Many amateurs are often at a loss what plants to select from the great variety offered in a catalogue, and to aid such we offer the following collections. In these collections we send our best plants and finest varieties, and purchasers secure them at less than regular rates, but in every instance the selection must be left to us. These collections embrace all the leading plants suitable for winter-flowering or decorating, all of which may be grown in a light window or sitting room, such as Begonias, Carnations, Fuchsias, Geraniums, Heliotropes, Palms, Pri mulas, Ferns, etc.

## CHINESE AZALEAS.

Ready in October. ng recent ye

No plant has increased in popularity during recent years with such amazing rapidity as the Chinese Azalea. A few years ago the annual importation would hardly exceed twenty-five-thousand, to-day it probably reaches two hundred and fifty thousand. At Easter they are seen in every church and in the windows of our finest residences throughout the country.

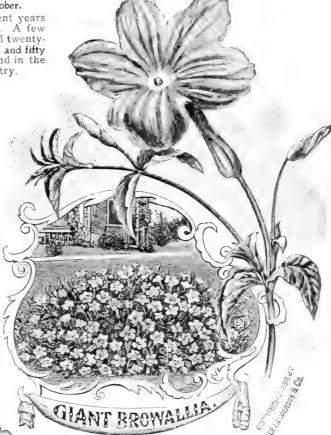

#### DOUBLED-FLOWERED AZALEAS.

Apollo. Large semi double flower; blood-red.
Bernard Andrea Alba. Very fine double white.
Concorde d'Orange. A grand double red.
Dame Matson. Clear white, red markings.
Deutsche Perle. Pure white; fine for forcing.
Docteur de Moor. Intense rose and violet.
Empereur de Bresil. Double pink, edged white.
Illustration. Pink, marked white; a very pretty sort.
Imperatrice des Indes. Rose, edged white.
Mme. Camille. White, striped and stained red.
Mme. Van der Cruyssen. Bright rose. (See cut.)
Niobe. Fine double white of extra substance.
Raphael. Pure white, double flower of fine form; late.
Simon Madner. Large flower; intense rose.
Vervaeniana. A beautiful rose, edged with white.

#### SINGLE-FLOWERED AZALEAS.

Apollon, Large, single white, sparingly lined red.
Eugene Mazel. Salmon rose, upper lobes violet.
Mme. de Grevy. Flesh color, spotted crimson.
Queen of Whites. Very fine, pure white.
Roi d'Hollande. Blood-red, spotted black.
Sigismond Rucker. Lilac rose, striped white.
Versicolor. Pure white, heavily striped deep red.

Fine plants, 14 to 16 inches across, \$1.00 each, \$10.00 per doz.,; 12 to 14 inches, 75c, each, \$7.50 per doz.; 10 to 12 inches, 50c, each, \$5.00 per doz.

## NEW GIANT BROWALLIA.

The flowers are indigo blue, fully 2 inches across, and cover the plant when in bloom. Invaluable for pot plants in the winter for greenhouse and window garden. (See cut.) Price, 15c. each, \$1.50 per d. z.

#### Double Golden Marguerite.

(Anthemis Coronaria fl. pl.

The flowers are clear golden yellow; it blooms without cessation the entire season; in winter as well as summer it is ever covered with bloom.

15c. each, \$1.50 per doz.

#### ARAUCARIA EXCELSA.

(Norfolk Island Pine.)

Deep green, feathery foliage arranged in whorls, rising one above the other at regular distances. It is easily grown in the house and is highly ornamental. Extra fine plants 20 to 24 inches high, \$2.50 each; 12 to 15 inches high, \$1.50 each; 9 to 13 inches high \$100, each

#### ACALYPHA SANDERII.

Comet Plant.

Long carmine crimson "tails" from the axils of the leaves. Very ornamental. Price, 25c, each.

# ৰ্টarnations.

## For Winter Blooming.

Flora Hill. Snow white. Emily Pierson. Deep red, fine large flowers.

G. H. Crane. Brilliant Scarlet.

Mayor Pingree. Clear yellow, very fine. White Cloud. Pure white, large flowers borne on long stems.

Lizzie McGowan. One of the best white varieties.

Meteor. Beautiful crimson maroon.

Mrs. Jas. Dean. Beautiful light pink. Victor. Deep salmon pink. A "sport" from Daybreak and considered superior to it.

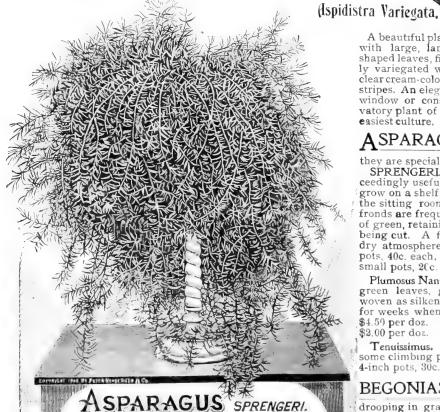

Wm. Scott. Flowers large and non-bursting, of a deep pink, stems long and of good strength. (See cut.) Price plants from open ground, not potted, 20c each, \$2.00 per doz., \$12 00 per 100; strong plants established in 5 and 6 inch pots (Ready Oct 1st.) for winter blooming, 40c. each, \$4.00 per doz., \$25.00 per 100.

AMELLIA JAPONICA. The collection embraces

double white, double pink, double red and double variegated. Price, \$1.00 each.

YPERUS ALTERNIFOLIUS. This is the popular "Um.

brella Plant." It is most useful, either as an aquarium plant or as an ordinary house plant, succeeding under either culture. Price, fine plants, 20c. each, \$2.00 per doz.

easiest culture. \$1.00 each. Plain green, 50c. each.

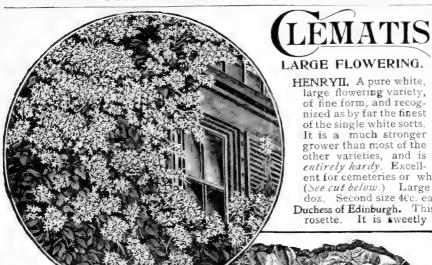

ASPARAGUS. Greenhouse climbing plants of rare beauty; they are specially suited for window gardening.

SPRENGERI. A most desirable species, exceedingly useful and ornamental as a pot plant to grow on a shelf in the window or on a pedestal in the sitting room, or to droop from baskets; the fronds are frequently four feet long, a rich shade of green, retaining their freshness for weeks after being cut. A fine house plant, as it withstands dry atmosphere. Price, fine plants from 5-inch pots, 40c. each, \$4.00 per doz. Young plants from small pots, 20c. each, \$2.00 per doz.

Plumosus Nanus. (Climbing Lace Fern.) Bright green leaves, gracefully arched, and as finely woven as silken mesh, retaining their freshness for weeks when cut. Large plants, 50c. each, \$4.59 per doz. Plants from 2-inch pots, 20c. each, \$2.00 per doz.

Tenuissimus. Very fine filmy foliage. A handsome climbing plant for the window. Plants from 4-inch pots, 30c. each, \$3.00 per doz.

BEGONIAS. (WINTER FLOWERING.) The flowers are beautiful drooping in graceful panicles of various colors, Price, 15c. each, \$1.50 per doz.

## LARGE FLOWERING.

HENRYII. A pure white, large flowering variety, of fine form, and recognized as by far the finest of the single white sorts. It is a much stronger grower than most of the other varieties, and is entirely hardy. Excell-

ent for cemeteries or wherever a hardy climber is desired. (See cut below.) Large strong plants, 60c. each, \$6.00 per doz. Second size 40c. each.

Duchess of Edinburgh. This variety is perfectly double, like a It is sweetly fragrant, and equally hardy and rosette.

vigorous with the others. Price 1st size, 60c, each, \$6 00 per doz. Second size, 40c. each.

SPECIAL NOTICE. - On account of the brittleness of the bark on Clematis it cracks very easily, and many people believe the plant to be permanently injured when such is not the case. We issue this notice on account of the numerous

letters we get on the subject.

wish to say, also, that we examine

all plants carefully before shipping, to see that they are in good condition, and if they die after being planted as must sometimes

happen, we do not agree to replace

## Large Flowering.

(Assorted).

Jackmanii Superba. Deep violet purple. A grand variety. Countess of Lovelace. Bright bluish lilac, double flowers. Lanuginosa Candida. White. Miss Bateman. Silvery white, dark anthers, attractive sort. Gipsy Queen. Rich purple. Belle of Woking. Silvery gray, double flowers, attractive. Mme. Baronne Veillard. Pretty lavender pink very distinct. Sieboldii. Beautiful lavender. Lilacina Floribunda. Lilac, large flowers, very free. Gen. Grant. Reddish purple.

very fine variety. Price, large two year-old plants, 50c. each, \$5.00 doz. Set of 14 varieties, including Jackmanii for \$6.00.

Star of India. Deep purple, a CLEMATIS JACKMANII.

HENRYU

## SMALL FLOWERING

CLEMATIS PANICULATA.

Paniculata. One of the most beautiful of our hardy fall-blooming vines. The flowers are pure white, very fragrant, borne in large clusters fairly covering the plant, so that it is a mass of fleecy white; the fragrance is delicious. (See cut)

Coccinea. Bright vermillion scarlet; flowers cone-shaped, Flowers bell-shaped. purplish blue, very fragrant. Flammula. (Virgius Bower). Pure white, blooms in large pendant clusters, fragrance ike hawthorn. (Ready in Oct.) Graveolens. A pretty variety

with light yellow clusters of flowers. (Ready in Oct.) Price for the above, 20c. each. set of 5 for 75c.

# Ölematis.

JACKMANII.

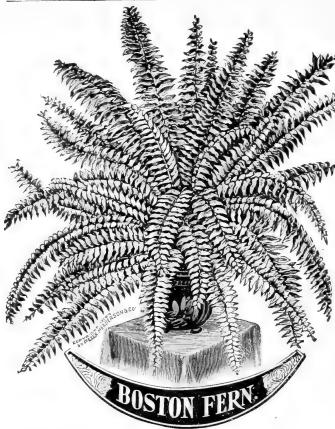

The best-known and most valued variety of this popular family. A most perfect mass of bloom when in full flower, Color. dark, rich, royal purple. The above engraving gives a good idea of this superb Clematis. (See cut.) Price, 60c. each, \$6.00 per doz.

# HRYSANTHEMUM

SPECIAL NOTICE.-Want of space in this catalogue will not permit us to list our full collection of Chrysanthemums. We have in stock, however, all the varieties offered in our spring catalogue of "Everything for the Garden," and can supply them at the prices quoted therein.

Our selection, a good assortment at 75c. per doz. \$4.00 per 100. SPECIAL.-Twelve selected varieties, plants from 5-inch

pots, 25c. each; set of 12 for \$2.25.

## ROSTON" FERN.

Nephrolepsis Bostoniensis.

One of the most useful and ornamental of the "Sword Ferns." It is now grown by the thousand for the market in all the large cities, and is steadily increasing in popularity. In well-grown specimens the fronds attain a length of 6 or 7 feet, like plumes arching over in every direction, in a most graceful manner. This beautiful Fern is excellent for outside planting in shady borders. It is a very fine plant for hanging pots or baskets on the piazza in summer and conservatory or window in winter. (See Cut).

Price, plants from 7 and 8 inch pots, \$1.50 each; 6inch pots, \$1.00 each; 5-inch pots, 60c. each, \$6.00 per doz.; 4 inch pots, 35c. each, \$4.00 per doz.; 3 inch

pots, 20c. each, \$2 00 per doz.

## OMPACT SWORD FERN. Nephrolepis Cordata

A fitting companion for the above; dwarfer and more erect in growth, a much darker shade of green, and very gracefully arched. For decoration in front of taller plants it is admirable. As a house plant it is very desirable.

Price, 1st size plants, \$1.00 each, \$9.00 per doz.; 2d size, 60c. each, \$6.00 per doz.; 3d size, 20c. each,

**\$2.00** per doz.

## URLED SWORD FERN. Nephrolepis Davallioides

Entirely distinct from the two described above. The fronds are long and broad, a glossy dark green, beautifully crested at the tops into curling masses of rich green, feathery foliage, the weight of which bends the fronds down so as to conceal the pot, allowing a full view of the centre of the plant.
First size plants, \$1.50 each; 2d size, \$1.00 each,

\$9.00 per doz.; 3d size, 60c. each, \$6.00 per doz.

## \* ASSORTED FERNS. \*

Our collection contains the choicest, including the "Maiden Hair" and best basket and vase sorts. Very appropriate for jardinieres. Price, 15c. each, \$1.50

#### DOUBLE GERANIUMS,

Gloire de France. Salmon and white. Profusion. Rich glowing salmon. Duc de Mortemort. Deep rose. Silver Queen. Pure white. Double Gen. Grant. Bright red. Le Cid. Dark Crimson.

#### SINGLE GERANIUMS.

L'Aube. White. Very free flowering. Single Gen. Grant. Brilliant scarlet. Salmon Queen. Salmon pink, a very attractive sort. Aurelian Scholl. Bright carmine pink, free blooming. Columbia. Dazzling scarlet, centre white.
Freedom. Rosy scarlet, centre white.
Price, 10c. each; set of 12 for 50c.

#### NEW GIANT-FLOWERED HELIOTROPE.

In this new race the size of the foliage and its quality are doubled; the habit of the plant is made compact and bushy instead of being scraggy and sprawling; the size of the flowers is magnified beyond belief, specimen heads measuring ten to fifteen inches across. (See cut). Price, 20c. each, 3 for 50c.

#### HARDY HERBACEOUS PLANTS.

We offer a choice collection of sorts for fall planting which will bloom next year. Price, 25c. each, \$2.25 per doz.; \$15.00 per 100.

#### HEATHS. (*Erica*).

We offer fine plants for winter blooming. Best known kinds. Price plants from 3 inch pots, 40c. each, \$4.00 per doz., from 6 inch pots \$1.50 each.

NEW GIANT FLOWERED HELIOTROPE

## ARECA LUTESCENS.

#### ARECA LUTESCENS.

This majestic Falm is without a peer for strength and elegance combined. Price, fine bushy plants, 15 to 18 ins. high, 7.c. each, \$7.50 per doz.; 24 to 28 ins , \$2.00 each; 30 to 36 ins., \$3.00 each.

#### RUBBER PLANTS.

We have a splendid stock of this useful and ornamental plant, which will flourish under the most adverse condi-Price, 12 to 15 ins. tions. high, 50c, each, \$5.00 per doz.; 15 to 18 ins., 75c. each, \$7.50 per doz; 24 to 30 ins., \$1 25 ea.

#### DRACAENA FRAGRANS.

Deep green, broad, grace-Price, fully drooping leaves. plants from 4-in. pots, 60c. each, \$6.00 per doz.

#### DRACAENA INDIVISA.

#### (The Fountain Plant.)

This plant is unsurpassed for hardiness in the house and eminently fitted to contrast with Palms and other decorative plants Strong plants, 30c. each, \$3.00 per doz.

# PALMS AND DECORATIVE PLANTS.

#### LATANIA BORBONICA (Fan Palm.)

This fine Palm is too well known to need any extended description Price, 3 in. pots, 25c. each, \$2.25 per doz.; 4-in. pots, 50c. each, \$4 50 per doz; 5-in. pots, 75c. each, \$7.50 per doz.; large plants from 7 and 8 in. pots, \$2.00 and \$3.00 each.

#### KENTIAS BELMOREANA AND FOSTERIANA.

The Kentias are among the best of the Palm species for general cultivation. (See cut) Price, strong plants, &-in. pots, \$4.00 each; from 7-in. pots, \$3.00 each; from 5-in. pots, \$1.25 each, \$12.00 per doz; from 4 in. pots, 75c. each, \$7.50 per doz.; from 3-in. pots, 35c. each, \$3.50 per doz.

#### COCOS WEDDELLIANA.

This beautiful Palm is unquestionably the most elegant and graceful in cultivation. The finely cut leaves are recurved with exquisite grace. Price, 11 feet high, \$1.00 each; plants from 8-in. pots, 3tc. each, \$3.00 per doz.

#### LIVISTONIA ROTUNDIFOLIA.

A very handsome compact variety, neat and attractive. A miniature "Fan Palm." Price, 75c. each.

CYCAS REVOLUTA OR SAGO PALM,

# (Sago Palm.)

CYCAS REVOLUTA.

For years the "Sago Palm" was so scarce that the price was very high and beyond the reach of ordinary plant buyers. We imported a fine lot of them from Japan and offer them very low so as to be within the reach of all.

It is probably the most valuable decorative Palm grown, both for lawn and house decoration; the heavy, glossy, deep green fronds resist alike the gas, dust and changes of temperature to which house plants are frequently exposed. (See cut ) Plants with 5 to 7 leaves, 18 to 20 ins. long, \$1.50 each; 7 to 9 leaves, 20 to 24 ins. long, \$2.50 each; 11 to 13 leaves, 24 to 30 ins. long, \$3.50 each.

#### DRACAENA

#### STRICTA GRANDIS.

Dark bronze foliage, beautifully marked with crimson. Price, 50c. each.

#### DRACAENA AMABILIS.

Green foliage beautifully marked with pink, rose and creamy white, Price, 50c. each.

DRACAENA TERMINALIS.

Bronze red, variegated crimson and pink. 40c. each, \$4.00 per doz.

DRACAENA LINDENII.
One of the finest of the species. Broad, strong leaves, gracefully recurved, heavily banded with creamy white and yellow on deep green ground. 4-in pots, \$1.00 each.

DRACAENA SANDERIANA.

A very pretty, variegated variety, marked green and white. Excellent for centres of jardinieres. Price, 50c. each.

#### PANDANUS UTILIS.

This is perhaps the most useful of our ornamental foliage plants. As a vase plant or single specimen in green house or conservatory it cannot be surpassed. (See cut.) Price, plants from 6 in pots, \$1.25 each, \$12.00 doz.

PANDANUS VEITCHIL

This is a grand decorative plant, creamy white variegation. Fine plants from 7 in. pots, \$2.00 each; 6 in. pots, \$1.50 each; 5 in. pots, \$1.25 each.

New Hardy Everblooming Rose...

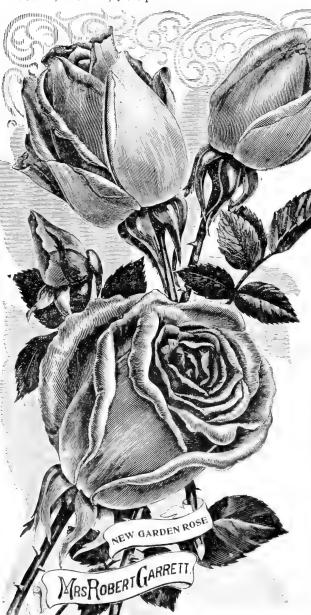

## ADMIRAL DEWEY.

A beautiful Rose shown on a colored plate in our spring catalogue. Color light flesh suffused with a beautiful rosy pink tint. It is a Hybrid Tea Rose, thrifty and free blooming. Price, strong plants from 5 inch pots, 50c. each, \$4.50 per doz.

#### MRS. ROBERT GARRETT.

A variety of American origin, therefore it is a certainty that it will prove to be adapted to our climate.

It is difficult to describe this Rose; much of the coloring is due to its form and its semi-transparency, and is generated as it were in the Rose itself. Speaking broadly, the general color effect is a glowing shell-like pink. Price, plants from the field, ready Oct. 2.th, 30c. each, \$3.00 per doz.

GEN. JACQUEMINOT ("JACK" ROSE.)

### ASSORTED HARDY ROSES \*\* ★ FOR OUTDOOR PLANTING.

Alfred Colomb. Carmine crimson. A grand Rose. Anna de Diesbach. Rich carmine.

Baroness Rothschild. An exquisite shade of satiny pink. Large cupped flowers. Massive stems and foliage.

Clio. A beautiful flesh color.

Coquette des Alpes. White, tinged blush, medium-sized flower, semi-cupped in form, a fine variety. Almost ever-blooming. Very long stems, fine for cutting.

Duke of Edinburgh. Bright vermillion. Eugene Furst. Velvety crimson, very large.

Fisher Holmes. Dark velvety crimson.

Gen. Jacqueminot. Brilliant crimson. The most widely popular Rose, better known perhaps as "Jack" Rose.

John Hopper. Bright rose with carmine centre. La France. Peach-blossom pink, ever-blooming. Margaret Dickson. White, with pale flesh centre. Magna Charta. Dark pink, one of the best Roses. Madame Plantier. Pure white, large clusters.

Marshall P. Wilder. Cherry rose, very fine.
Mrs. John Laing. Rich, satiny pink, delicious fragrance.
Paul Neyron. Flowers 5 inches across, lovely dark pink.
Persían Yellow. Hardy yellow Rose; best of its color.
Ulrich Bruner. Cherry red, a grand Rose.

Price for the above, strong 2-year-old plants, budded low on Manetti stocks, 30c. each, \$3.00 per doz. Ready October 20th.

RUGOSA ROSES.

Very ornamental foliage, large single flowers followed by conspicuous orange red "heps" or fruits.

Rugosa Alba. Pure white.

"Rubra. Rich carmine.

Mme. G. Bruant. White, a grand variety.

Price, 30c. each, set of 3 for 75c. Ready Oct. 20th.

MONTHLY ROSES.

A fine assortment from open ground ready Oct. 20th. If set out this fall and well protected, should bloom freely next season. Fine stock for carrying over in cold frames for early blooming. Price, 3°c. each, \$3.00 per doz.

## THE CRIMSON RAMBLER ROSE.

Plants from open ground ready October 20th.

This grand rose improves upon acquaintance. The better it is known the more popular it becomes. It is of rapid, vigorous growth; plants in our grounds attained a height of fifteen feet the past season. The flowers are produced in trusses, pyramidal in shape, good specimens measuring nine inches from base to tip, and seven inches across, fairly covering the plant from the ground to the top, so that it is one mass of glowing crimson. The color is superb and remains strong and vivid to the end; plants in our grounds retained the bloom for two months. The profusion of bloom is marvelous, over three hundred blooms having been counted on one shoot.

YELLOW RAMBLER. AGLAIA.

It is perfectly double, very fragrant, entirely hardy, having withstood, unprotected, a prolonged temperature of from zero to two degrees below. It is related to the Crimson Rambler, and, like it, blooms in large trusses. The flowers last three to four weeks without fading. It is a very vigorous grower, making shoots 8 to 10 feet in one season when well established.

## THE WHITE RAMBLER, THALIA.

This variety bears clusters of pure white flowers, which are deliciously fragrant. The flowers remain on the plant a long time-from three to five weeks-and keep a long time when cut. The plant is perfectly hardy, equal in this respect to the Crimson Rambler, and where one is

planted the other should be also. By growing this in a pot and training it to a pyramidal trellis, a fine plant may be had in bloom for Easter.

#### THE PINK RAMBLER. EUPHROSYNE.

This beautiful variety is fit to rank with the two above mentioned. It is from the same source as the White Rambler, fully the equal of both in hardiness, vigor, size and profusion of flowers and blooming qualities.

Price, for the four "Ramblers" above, plants from the field ready Oct. 20th, 30c. each, \$3.00 per doz.

SPECIAL.—The four "Ramblers," \$1.00; young plants, 35c. NOTE.—The Crimson Rambler is undoubtedly superior to the others, but they are very useful climbing roses.

#### ASSORTED HARDY CLIMBING ROSES.

We offer a few of the standard varieties of climbing roses, commonly known as "Prairie Roses." They are most useful and are hardy in the most exposed places in the North.

Anna Maria. Deep pink, very full.

Baltimore Belle. Blush white, large clusters.

Gem of the Prairies. Deep rosy carmine.

Price, 30c. each, set of 3 for 75c. (Ready Oct. 20th).

# HARDY CREEPING ROSES,

FOR GROWING ON THE GROUND OR CLIMBING.

### The Memorial Rose.

(Rosa Wichuraiana.)

The grandest plant for cemetery decoration in existence. It grows flat on the ground, like an ivy, and blooms in grand abundance throughout July and intermittingly the balance of the season, pure white, sweetly fragrant flowers, with a golden yellow disc. It is perfectly hardy, and if planted this fall should bloom next season. Price, strong plants from open ground, 30c. each, \$3.00 per doz. Ready Oct. 20th. Young plants from pots, now ready 15c. each, \$1.50 per doz.

## Double White "Memorial Rose."

(Triumph.)

Blooms in clusters of from 12 to 18 flowers on each. literally covering the plant. This variety is valuable for all purposes, whether for trailing on the ground for cemetery use, growing on fences and gate posts, boundary walls, or as specimens in pots or tubs. (See prices next column).

## Double Pink "Memorial Rose."

(Universal Favorite.)

A fitting companion to "Triumph;" identical in growth but with perfectly formed double flowers 11 to 2 inches in diameter, of a soft, light pink, and very fragrant.

## South Orange Perfection.

Double flowers, soft blush changing to white, about 11 inches in diameter. This is a very pretty variety and entirely distinct from the others.

#### Pink Roamer.

The flowers are single, over 2 inches in diameter, a bright, rich pink, with a large, silvery-white centre and orange red stamens, producing a most charming effect. Very fragrant.

Price for the above, except where noted, 25c. each, \$2.25 per doz. Plants from open ground ready Oct. 20th.

Young plants. now ready, 10c. each.

SPECIAL.—Set of five creeping Roses above from open ground, \$1.00; young plants, 50c.

#### HINESE PRIMROSE For winter flowers

there is no more desirable plant than the Chinese Primrose. They are easily grown and flower incessantly throughout the winter. Onr plants comprise all the shades of crimson, pink, white and variegated. 1st size, 25c. each, \$2.25 per doz.; 2d size, 15c. each, \$1.50 per doz. (See Cut.)

#### THE "BABY" PRIMROSE.

A very attractive variety, blooming most profusely during the winter and spring, in fact it blooms continuously for nine months. The sprays of rosy lilac flowers are very graceful and exceedingly useful for cut flowers. It is easily grown in the house. Price, 15c. each, \$1.50 per doz.

## PRIMULA OBCONICA.

A favorite pot plant for house and con-servatory culture on account of its wonderful blooming qualities, flowering nearly all the year through. Price, 25c. each, \$2.25

## New Hardy White Pink, "Her ."

Low growing, with flowers of the purest white, as large as a Carnation, rich Clove fragrance. Price, 25c. each, 5 for \$1.00; 12 for \$2.00.

## VIOLET MARIE LOUISE.

The well-known winter-flowering, double purple variety. We offer strong, healthy plants, so that any amateur should have no difficulty in growing them. \$1.50 per doz., \$10.00 per 100.

## ARDY ENGLISH VIOLET.

Entirely hardy, double, a deep violet color and most deliciously fragrant. It is for spring blooming only. (See Cut.) Price, 1st size, 35c. each, \$3.50 per doz., \$20.00 per 100; 2d size, 20c. each, \$2.00 per doz., \$15.00 per 100.

## Single Violet California.

Large, deep purple, fragrant flowers. 15c. each, \$1.50 per doz., \$10.00 per 10%.

#### OTAHEITE ORANGE.

A dwarf Orange, which bears a profusion of fragrant flowers and edible fruit. One of the most effective plants for the house. Price, large plants, 50c. each. Young plants, 15c. each, \$1.50 per doz.

#### LARGE-FLOWERING PANSIES.

These are from seed of our own saving, and we can unhesitatingly recommend them for either winter or spring blooming. 5c. each, 50c. per doz., \$3.50 per 100.

#### SMILAX VINES.

Familiar to every one. Easily grown if trained to strings. 10c. each, 75c. per doz., \$4.00 per 100.

# ARDY CLIMBING VINES.

#### Ready Oct. 20th.

Ampelopsis Veitchii. (Sometimes called "Boston Ivy" and "Japan lvy.") Clings closely to brick, stone or wood work.

A. Quinquaefolia. The old Virginia Creeper.
A. Dissecta. Beautifully cut leaves.
A. Sieboldii. Variegated foliage, very ornamental.

Akebia Quinata. Dark brown flowers. Fragrant.

Aristolochia Sipho. (Dutchman's Pipe.) 50c. each, \$4.50 per doz. Bignonia Grandiflora. Scarlet Trumpet Vine. Celastrus Scandens, (Bitter Sweet.) Quick growing, clusters of red berries.

Clematis. See page 49.

Climbing Hydrangea. Strong plants 75c. each.

Honeysuckles. Yellow, coral or scarlet, white, pink, evergreen and

golden leaved; fine plants.

Ivy English. Evergreen. Large foliage.

Jasminum. (Officinalis.) Hardy White Jasmine.

Jasminum Nudiflorum Hardy Yellow Jasmine.

Wistaria Sinensis. White. 50c. each. Wistaria Sinensis. Soft lavender blue. 35c. each.

All of the above Hardy Climbing Plants at 25c. each, \$2.25 per doz., except where otherwise noted.

# Hardy Ornamental Flowering Shrubs

### DECIDUOUS AND EVERGREEN.

For Borders, Massing or Single Specimens. For Hedges. For Cemeteries. For Pleasure Grounds. For Door Yards or Large Private Estates. & &

READY FOR DELIVERY ABOUT OCTOBER 20th. 20

Below we offer a carefully selected list of hardy shrubs, to which we invite special attention. They are all 3 to 4 years, transplanted, and range from 2 to 3/2 feet in height according to variety; some, being stronger growing, are consequently taller at the same age. THE LETTERS FOLLOWING THE NAMES INDICATE THE SEASON OF BLOOMING, thus: A, April bloomlng; B, May; C, May and June; D, June; E, June and July; F, June to October; G, July to October; H, July and August; 1, August and September. A few bloom continuously from springuntil frost, as told in the descriptions.

Althea, Double White. (1) Beautiful shrub; double flowers. The well-known "Rose of Sharon."

Althea, Doubie Red. (1) Similar to above, color red.

Azalea, Hardy. (c) Assorted colors. \$1 00 each. Berberis Purpurea. (c) (Purple Berberry.) Very pretty purple foliage, desirable for massing with other shrubs.

Berberis Thunbergii. (c) One of the handsomest shrubs in cultivation, brilliant red berries in fall and winter.

Calycanthus Floridus. (D) Strawberry-scented shrub.
Cercis Canadensis. (B) (American Judas Tree.) A small.
very ornamental flowering tree, bearing a profusion of light pink flowers. A very attractive shrub.

Chionanthus Virginica. (c) (White fringe.) White fringe like flowers, completely covering the bush. Large, grapelike, purple berries in late summer.

Clethra Alnifolia. (1) (Sweet Pepper Bush ) A useful shrub, covered with upright spikes of yellowish white, sweet-scented flowers. Grows well in shady places.

Corchorus Japonica. (6) Slender growth; yellow flowers.
Corchorus Jap. Alba. (6) Similar to the above, but bears
pure white flowers; very ornamental.
Corchorus Jap. Var. (6) Another variety of the preceding,

with leaves prettily variegated white and green.

Cornus Floridus. (D) (Dogwood.) An interesting species with pure white flowers, followed by showy fruit; symmetrical growth growing twelve to thirty feet.

Deutzia Candida fl. pl. (E) Double white flowers; wellknown and valuable shrub.

Deutzia Grenata. (B) Pure white, tinged rose color.

Deutzia Gracilis. (D) Pure white, low compact habit.

Deutzia Lemoineit. (E) A fine and improved variety, the branches covered with erect panicles bearing 15 to 25 large, pure white, well opened flowers.

Exochorda Grandiflora. (B) Pure white flowers.
Forsythia Viridissima. (A) Bearing numerous bright yellow flowers which appear before the leaves. sprays of flowers.

Forsythia Suspensa. (A) (Weeping Forsythia.) A shrub resembling the above in its flowers, drooping habit.

Hedysarium Multijugum. (A) Blooms continuously from spring until frost. Flowers deep violet red, in clusters 1 to 11 feet long. A most beautiful and novel shrub, growing five to six feet high. Price, 50c, each.

Hypericum Moserianum, (F) A low-growing graceful

shrub covered with large bright yellow flowers from

June until frost. Very satisfactory shrub.

Hydrangea Paniculata Grandiflora. (I) Large white panicles of flowers, changing to pink at the base, gracefully drooping with its wealth of bloom. Used largely in cemeteries. Large bushes, 21 to 3 ft., 50c. each.

Kerria Japonica. (9) Double yellow flowers. Philadelphus Coronarius. (D) The popular "Mock or-Pure white, fragrant flowers. Philadelphus Foliis Aureus. (D) Very ornamental, bright

yellow foliage, white flowers, very graceful.

Philadelphus Lemoineii. (D) A vastly improved variety, very large sweetly fragrant flowers.

Prunus Pisardi. (Purple-leaved Plum.) Foliage, fruit and

shoots of bright purplish red.

Prunus Triloba. (B) (Double flowering Plum.) Large, pink flowers, very double. A very attractive shrub.

Pyrus Japonicus. (A) (Japan Quince.) Scarlet flowers. Ribes Missouriensis. (B) (Flowering currant.) Rhododendrons. (c) The grandest of hardy evergreen

shrubs, in flower and foliage. Colors, rose, crimson pink, white, lilac, purple and variegated. Plants with 8 to 10 buds, \$1.50 each; 10 to 15 buds, \$2 00 each.

Sambucus Aurea. (Golden-leaved Elder.) The finest golden-leaved shrub, and invaluable for producing The finest strong effects in grouping.

Spiraea Bumalda. (F) Large flat heads of rosy pink flowers, dwarf compact habit.

Spiraea Callosa. (F) (Superba.) Large flat clusters of

pink flowers born freely. A grand hardy shrub.

Spiraea Douglasi. (H) A beautiful variety bearing spikes of beautiful rose-colored flowers.

Spiraea Thunbergii. (B) Of dwarf habit and graceful form;

flowers small, white, appearing early in spring.

Spiraea Prunifolia. (c) (Bridal Wreath.) Pure white double flowers completely covering the branches.

Spiraea Van Houtteii. (D) Flowers pure white, born in greatest profusion; one of the best in its class.

Spiraea Anthony Waterer. (F) Rosy red flowers.
Syringa. (Lilac.) (B) The purple sweet-scented variety.
Syringa Persica Alba. (B) (The White Persian Lilac.) Beautiful sprays of white flowers; slender, graceful growth. A grand plant for cemetery. 35c. each.

Tamarix Gallica. (c) (Weeping Beauty of the Forest.)
Slender, graceful habit, covered with pretty pink flowers.

Fine for the seashore.

Viburnum Opulus. (D) (Common Snowball.) Large, white flowers, scarlet berries late in fall and winter.

Viburnum Plicatum. (D) (Japan Snowball.) Superior in foliage and flower to the above. An exceedingly handsome shrub. Price, 21 to 3 ft., 50c. each, \$4.50 per doz.; 12 to 18 inches, 30c. each, \$3.00 per doz.

Weigelia Candida. (F) Pure white flowers.
Weigelia Rosea. (E) Rich rose-colored flowers.
Weigelia Rosea Var. (E) A variety bearing rose-colored flowers with beautifully variegated foliage.

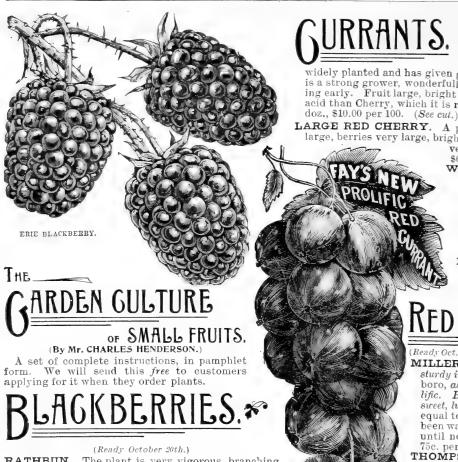

Xanthoceras Sorbifolia. (c) Blooms in upright spikes, flowers bell-shaped, over an inch across, pure white, the centre rich reddish brown. Foliage somewhat like a Mountain Ash. 50c. each.

## Hedge Plants.

Privet. (Californian.) A splendid hedge plant; glossy green Foliage, white flowers. Price. \$1.00 per doz., \$6.00 per 100, 2½ feet high. 2 feet high, \$4.00 per 100.

#### OFFERED AT THE FOLLOWING VERY LOW RATES FOR FALL DELIVERY.

All the shrubs on this page we can supply at 20c. each, \$2.00 per doz., \$12.00 per 100, EXCEPT WHERE NOTED, purchaser's selection of varieties. OUR SELECTION, \$1.50 per doz., \$10.00 per 100. These shrubs cannot be sent by mail; they can only be sent by express or freight, purchaser to pay charges. READY FOR SHIPPING ABOUT OCTOBER 20th.

RATHBUN. The plant is very vigorous, branching naturally, producing fruiting canes very freely and an abundance of large, luscious fruit. It "suckers" but slightly, the roots are strong and branching, penetrating deeply into the soil, a valuable characteristic in dry seasons and locations. The fruit is very large and handsome, intense black with a very high polish and without any hardcore, juicy, high-flavored; of so superior a quality that it is in a class by itself. Those accustomed to the old varieties would scarcely recognize it for a Blackberry. For table use, for canning or for culinary purposes it is equally desirable. It literally melts in the mouth, Price, 15c. each, 12 for \$1.50, 25 for \$2.75, 50 for \$5.00, 100 for \$8.00.

ERIE. The canes are of ironclad hardiness, strongest growth, free from all diseases, and wonderfully productive. The berry is of the very largest size, of excellent quality. (See cut.) 60c. per doz., \$4.00 per 100.

Early Harvest. The berries are of large size, very uniform and of a bright glossy blackness. For the South its value can scarcely be overestimated. Kittatinny. The berries are large, handsome and of delicious flavor; canes of strong, erect growth and productive. Season medium to late. Wilson Junior. It possesses all good qualities, combining size, earliness

and productiveness.

DEWBERRY, Lucretia (or Creeping Blackberry), conceded to be the finest of its class, as early as Early Harvest and as large as the Erie Blackberry. The quality is superb, juicy and melting.

Price for any of the above (except where noted), 50c. per doz., \$2.50 per 100, \$20.00 per 1,000. If wanted by mail, add 10c. per dozen.

YELLOW RASPBERRY, Golden Queen. The most popular and best Yellow Raspherry yet introduced. Of large size, great beauty, high quality, hardiness and productiveness. Fully equal to Cuthbert in size of fruit and vigor of growth.

Price, 50c. per doz., \$2.50 per 100, \$20.00 per 1,000, by express or freight, buyer to pay charges. If wanted by mail, add 10c. per dozen.

(CANNOT BE MAILED.) (Ready October 20th.) FAY'S PROLIFIC. This is

decidedly the best Red Currant we have. It has been widely planted and has given general satisfaction. The bush is a strong grower, wonderfully prolific, and comes into bear-Fruit large, bright red, and of good flavor, and less acid than Cherry, which it is rapidly superseding. \$1.50 per

LARGE RED CHERRY. A popular market sort. Bunches large, berries very large, bright, sparkling crimson, beautiful, very acid. 2 year, \$1.00 per doz., \$6.00 per 100.

WHITE GRAPE. The largest and decidedly the best white variety, and one of the best of any for the home garden. Bunch large and long; berry large, handsome, translucent white and of best quality, being less acid than others. 2yr., \$1.00 per dz , \$6.00 per 100.

BLACK CHAMPION. A fine Black Currant and a general favorite. \$1.00 per doz., \$6.00

per 100.

# RED RASPBERRIES

(Ready Oct. 20th.) If wanted by mail, add 10c. pr. dz. MILLER. The Miller is as vigorous and sturdy in cane as the Cuthbert and Marlboro, as early as Thompson's Early Prolific. Beautiful and brilliant color, and in sweet, luscious flavor and hardiness fully equal to Turner-just what we have all been wanting so long but never obtained until now. **Price**, 10c. each, 3 for 25c., 75c. per doz., \$4.00 per 100.

THOMPSON'S EARLY PROLIFIC. A fine early Red Raspberry for general cultivation. An excellent grower; canes hardy. Berries are medium to large, bright crimson, very productive.

CUTHBERT. The leading market variety. Canes hardy, large, healthy foliage, and exceedingly productive. Berries large, dark crimson, quite firm and of good flavor. Season late. (See cut.)

MARLBORO. The largest of the early red raspberries, ripening a few days later than Hansell. Canes hardy and productive. Fruit exceedingly large,

bright crimson, fine quality.
TURNER. (Southern Thornless.) Very desirable as an early sort for the home garden. Berries of good size, bright crimson. Price (except where noted), 50c. per doz., \$2.50 per 100, \$20.00 per 1,000.

CUTHBERT RANPBERRY

## STRAWBERRY PLANTS.

POT GROWN.

Space will not permit us to give descriptions of the numerous varieties which we offer, all of which are fully described in our Strawberry Catalogue, a copy of which may be had upon application by any who did not receive it.

Ground Layers we can supply, if wanted, after October 25th, at

half the rates quoted in that catalogue.

## GOOSEBERRIES.

Ready October 20th. Cannot be mailed.)

Houghton. A vigorous variety, not much affected by mildew. 2-year plants. 75c. per doz., \$5.00 per 100.

Downing. The best of the American sorts and a vast improvement upon the Houghton, of which it is a seedling. Fruit large. pale green, and of excellent quality, both for cooking and table use. Bushes stocky, vigorous, hardy, very prolific. 2-year plants, 10c. each, \$1.00 per doz., \$7.50 per 100.

#### BLACK RASPBERRIES. "CAPS."

(Ready October 20th. If wanted by mail, add 10c. per doz.)

Falmer. Very early, grand for either family or market, vigorous and hardy, with healthy foliage; wonderfully productive. (See cut.)

Ohio. Exceedingly productive, very hardy and free from disease; berries of good size, jet-black and of excellent quality.

Gregg. A popular market sort. Canes of strong, vigorous growth; berries very large, covered with heavy bloom, firm, meaty, and of fine flavor. It responds liberally to generous treatment.

Shaffer's Colossal. Canes are of wonderful vigor and size, hardy and enormously

productive. Berries large, luscious, rich, sprightly flavor.

Souhegan, or Tyler. A very early Blackcap, and the leading early market sort. Canes vigorous and hardy, wonderfully productive. Fruit of good size, jetblack, with but little bloom; firm, sweet and pleasant.

All the above (except where noted), 50c. per doz., \$2.50 per 100, \$20.00 per 1,000.

### HARDY GRAPES IN VARIETY.

(Ready October 20th.) (All two-year vines.)

Berries large, of bronze color. 25c. each, \$2.50 per doz.

The best grape in its color for table use. Bronze-black; ripens with the Delaware. 25c. each, \$2.50 per doz. Brighton. Bunch and berries large, color black. 20c. each, \$2.00 per doz. Concord.

Red; bunches compact, berries small and sweet. 25c. each, \$2.50 per doz.

Eaton. This fine Grape is similar in foliage to Concord, and in growth, health, hardiness and quality is in every respect its equal, while in size of bunch and berry it is much larger and more attractive in appearance. 30c. each, \$3.00 per doz. Gærtner. A beautiful light red, almost transparent, sweet, tender,

sprightly and pleasant. 25c. each, \$2.50 per doz.

MOORE'S DIAMOND GRAPE

Golden Pocklington. Very large, deep amber in color. One of the most attractive grapes grown. 25c. each, \$2.50 per doz.

Lindley. Berry medium to large; color, a rich shade of red, rendering it a very attractive grape. 25c. each, \$2.25 per doz. Moore's Diamond. In vigor of growth, color and texture of foliage,

with hardiness of vine, it is the equal of its parent "Concord," while in quality the fruit is equal to many of our hothouse grapes. It is amongst the earliest and ripens from two to four weeks ahead of "Concord." (See cut.) 30c. each, \$3.00 per doz.

Moore's Early. Resembling the "Concord" in style of growth and

berry; ripening two weeks earlier. 30c. each, \$3.00 per doz. Martha. Greenish white; exquisite flavor. 20c. each. \$2.00 per doz. Merrimack. Large berry; jet-black. 25c. each, \$2.50 per doz.

Niagara. A grand white grape. 25c. each, \$2 50 per doz.

Salem. A splendid coppery red grape, ripening with "Concord," tender, juley; one of the very best. 25c. each, \$2.50 per doz.

Worden. Black. Large size, early. 25c. each, \$2.50 per doz.

Wilder. Bunches large; color black. 25c. each, \$2.50 per doz.

## FOREIGN GRAPE VINES.

Black Hamburg, Muscat of Alexandria, Bowood Muscat, Maddresfield Court, Mrs. Pince's, Barbarossa, Muscat Hamburg, Buckland's Sweet Water. Strong one-year vines. \$1.00 each, \$10.00 per doz.

## RHUBARB ROOTS. (Ready October 20th.)

St. Martin's. It is not only immensely productive, but it is also one of the earliest, and, above all, it has a rich spicy flavor, very similar to the gooseberry. 20c. each, \$2.00 per doz.

Linnæus. The standard variety. 15c. each, \$1.50 per doz.

PALMER BLACK RASPBERRY.

HENDERSON'S PALMETTO ASPARAGUS ROOTS.

(Ready in November for the South, and in March and April for the North.)

Early, large, tender, delicious. The finest Asparagus grown. The Palmetto is not only much earlier, but is also a better yielder, and is more even and regular in its growth than any other variety, and must eventually supplant all older sorts. Average bunches containing fifteen shoots measure 13½ inches in circumference, and weigh about two pounds. The Palmetto has now been planted in all parts of the country, and it has been proven equally well adapted for all sections North and South. Its quality is unequaled. (See cut.)

Palmetto. Asparagus roots (a saving of one to two years is effected by planting roots). Splendid two-year-old. \$1.50 per 100, \$10.00

Palmetto. Asparagus roots (a saving of one to two years is effected by planting roots). Splendid two 1,000. 50 roots at 100 rate; 500 at 1,000 rate. If to be sent by mail, add 40 cents per 100 to the prices.

HENDERSON'S "EARLY SNOWBALL" CAULIFLOWER.

## Beyond Question THE BEST Cauliflower

FOR EITHER EARLY OR LATE, FOR FAMILY OR MARKET GARDEN, FOR FORCING OR COLD FRAMES.

#### IT HEADS WHERE OTHERS FAIL.

Those who have never succeeded before should grow "HENDERSON'S SNOWBALL."

It is hardly necessary for us to describe this variety at all as its name has now become a household word wherever this delicious vegetable is grown. Snowball Cauliflower is the standard everywhere for quality with the seedsman, the market gardener and the amateur. While originally recommended and used as an early variety, it has not only supplanted all other sorts for early spring planting, but it has largely driven out the large late sorts for fall use, being much finer in quality, and the only Cauliflower that is absolutely certain to head when the conditions are right, forming a perfect snow-white head, averaging nine inches in diameter.

HENDERSON'S EARLY SNOWBALL CAULIFLOWER is superior to all others. It is the earliest of all Cauliflowers. Its close-growing, compact habit enables one-third more to be planted on the same space of ground than can be done with any other variety. For forcing under glass during winter and spring, this **Early Snowball** variety is peculiarly well adapted, from its dwarf growth and short outer leaves, and for this purpose no other Cauliflower is now so largely grown. (See cut.) Price, 25c. per pkt., \$4.00 per oz., \$14.00 per 1/4 lb.

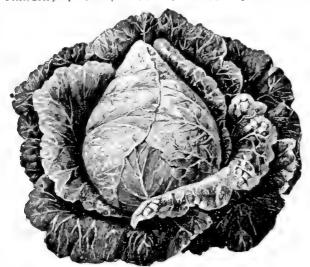

DO NOT FORGET TO AVAIL YOURSELF OF OUR LIBERAL PREMIUMS. See 2d page Cover.

#### = = HENDERSON'S = =

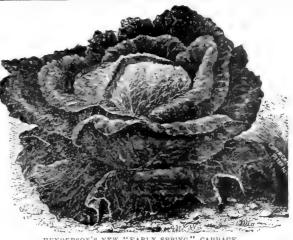

## "EARLY SPRING" CABBAGE.

A New Extra Farly Cabbage, with a Round Flat Head, coming in with the Wakefield.

The most valuable early Cabbage ever introduced. The variety is of Early Summer type, but about one-fifth smaller, having only four or five outside leaves, and these so small, and growing so near to the head, that outside leaves, and these so small, and growing so near to the head, that it may be successfully planted twenty-one inches apart, as close as any variety we know of. But its great value lies in the fact that it is the only first Early Flat Cabbage. It possesses wonderful uniformity in shape, being round, slightly flattened at top of head. Stem is short and extends but little into the head; this feature is valuable, as it makes almost the entire head edible. The veining of the leaves is particularly fine, in which respect it shows its finely bred character, being entirely free from any coarseness whatever. There is no Cabbage we know of having a more solid head; but, added to this, it has the peculiarity of heading firmly at an early stage in its growth, so that the finest Cabbage, though small, can be obtained long before it has attained its mature size. It is entirely free from any rankness of flavor. (See ent.) Price, 15c, per pkt., 60c. per oz., \$2.00 per ½ lb., \$6.00 per lb.

HENDERSON'S EARLY JERSEY WAKEFIELD CABBAGE.

"EARLY SPRING" CABBAGE.

## HENDERSON'S Selected Early Jersey Wakefield.

The merits and characteristics of the Early Jersey Wakefield Cab-The merits and characteristics of the Early Jersey Wakefield Cabbage are nowso well known as to hardly need repeating here; still as our catalogue annually falls into the hands of thousands who have not before seen it, we may state that it is universally considered the best early Cabbage in cultivation. Among its merits may be mentioned its large size of head for an early sort, small outside foliage, and its uniformity in producing a crop. The heads are pyramidal in shape, having a blunted or rounded peak. Our seed of this famous Cabbage is very choice, being saved from selected fine hard heads. (See cut.) Price, 5c. per pkt., 35c, per oz., \$1.20 per ½ lb., \$3.75 per lb.

"Had Peter Henderson done nothing else but introduce the Early Wakefield Cabbage, it would be a lasting monument to his name. No better variety is in cultivation to-day among the early kinds:"—Country Gentleman.

# THE CHARLESTON OF WAKEFIELD.

For some years past customers have requested us to procure for them, if possible, a Cabbage which had all the characteristics of the Early Jersey Wakefield but of a greater size. With this in view, we carefully selected from one of our best stocks of Wakefield a larger type, which is now so fixed in its character that we can offer it with confidence to those desiring a Cabbage of this kind. This selection will average about 50 per cent, larger in size than the old type of Wakefield, and is only two or three days later. Price, 10c. per pkt., 40c per oz., \$1.25per ½ lb., \$1.00 per lb.

Henderson's Succession Cabbage.

IS POSITIVELY THE

## FINEST CABBAGE IN EXISTENCE,

Whether for Medium Early, Main Crop or Winter use. PERFECT in every respect.

The Succession Cabbage we consider one of our most valuable contributions to horticulture. It would be classed as a second early, coming in a few days later than Early Summer, but it is immeasurably superior to that variety; it is of nearly double the size and is absolutely true to its type under all conditions. In addition to this, it has no tendency whatever to or to the sead. We can say without exaggeration that it is the finest Cabbage in existence to-day; whether for medium early, main crop or late use it has no equal. It is so finely bred and so true to type that in a field of twenty acres every head appears alike. We can recommend it either for the market garpears alike. We can recommend it either for the market gar-dener, trucker or private planter, as it is a perfect cabbage in every respect, not only being of the largest size, but of hand-some color and of the finest quality. It is probably the safest variety for an amateur to plant, as it does well at all seasons, and one is almost sure of getting a crop, no matter when it is planted. Our stocks of Cabbage of all varieties have for years been the acknowledged standard of excellence in this country, and when we state that we consider Succession to be the most valuable variety that we have averaged. one when we state that we consider Succession to be the most valuable variety that we have ever introduced, our opinion of its great merit will be apparent to all. (See cut.) Price, 10c. per pkt., 40g. per oz., \$1.25 per ½ lb., \$4.00 per lb.

## LAWN GRASS SEED. "Henderson"

Our Lawn Grass, sown in the Autumn, will produce a fine, luxuriant Lawn EARLY the following season.

## The "Henderson" Lawn Grass Seed

is the best lawn seed for our American climate. It is composed of various grasses that grow and flourish during different months of the year, so that a rich, deep green, velvety lawn is constantly

maintained, rivaling the famous lawns of Old England. The "Henderson" Lawn Seed is the result of several years' careful experimenting, and is unequaled. We have made the formation of perfect and permanent lawns a study for years, and the finest lawns in this country prove our ability.

#### THE BEAUTIFUL LAWNS AT THE WORLD'S FAIR IN CHICAGO = =

We produced in six weeks' time by sowing our

# "HENDERSON" LAWN

Not one of the charming features at the Exposition was so universally admired as our "setting of emerald velvet," which, notwithstanding the long-continued drought of the summer, retained its verdure throughout the entire season. Besides being the only lawn grass seed granted a medal, we exhibited the separate grasses used in the mixture and received Seven Awards for superior quality and purity of sample. The "Henderson" Lawn Grass Seed is, relatively speaking, the cheapest seed offered, because, while the lawn grass mixtures of other seedsmen will not average over 14 lbs. to the bushel, this weighs from 20 to 21 lbs. per measured bushel.

#### THE QUANTITY REQUIRED. 🚜

The quantity required for making new lawns is 5 bushels per acre, or for renovating old lawns 1 to 2 bushels. For a plot 15 x 20, or 300 square feet, I quart is required for new, or I pint for renovating old lawns. Full printed instructions in every package and bag.

PRICES: Per qt., 25c.; per peck, \$1.50; per bush., \$5.00. (If by mail, add at the rate of 5c. per quart for postage.)

## HENDERSON'S "TERRACE SOD"

A special mixture of grasses best suited for sow-A special mixture of grasses best suited for sowing on terraces, railroad embankments and side hills—grasses that produce strong, spreading roots, thus preventing heavy rains from washing them out, that will withstand drought and exposure, thrive on shallow soils, and at the same time produce a rich, velvety green turf throughout the senson the season

Price, 35c. per qt., \$2.00 per pk., \$7.00 per bushel of 20 lbs. (If by mail, add at the rate of 5c. per quart for postage.)

### "SUNNY SOUTH"

LAWN GRASS.

Specially prepared for the South or for very dry

specially prepared for the South or for very dry sections, and contains the best grasses adapted for hot, dry situations.

Price, 35c. per qt., \$2.00 per pk., \$7.00 per bushel of 20 lbs. (If by mail, add at the rate of 5c. per quart for postage.)

# St. St. St. St. St. St. St. St.

#### HENDERSON'S "SHADY NOOK" LAWN GRASS.

On nearly all lawns there are unsightly bare spots under the shade of trees, which have baffled all efforts to get into grass, but with this mixture there need be no further difficulty.

Price, 35c. qt., \$2.00 pk., \$7.00 bushel of 201bs. (If by mail, add at the rate of 5c. per qt. for postage.)

### HENDERSON'S "GOLF LINK"

GRASS SEED.

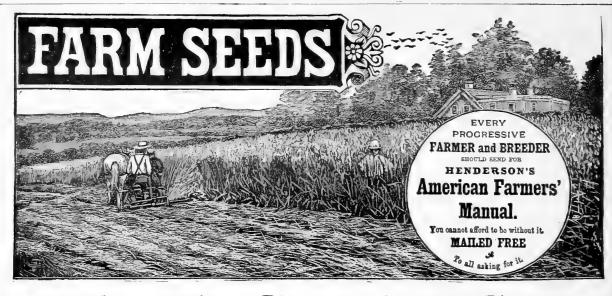

We have given much attention to grasses for golf links, and the best links in the United States

golf links, and the best links in the United States and Canada to-day show our success.

When golf first became popular one of our representatives visited several of the famous Scotch links and found that most of the grasses which formed these links can be grown here. The mixtures we offer below are largely composed of such imported varieties as will thrive here, with the addition of coveral country for Arrelia. the addition of several equally fine American varieties. By the use of these mixtures, and with proper care and attention, the finest gold links and putting greens in the world can be successfully rivaled.

Grass Mixture for "Putting Greens"-Price, 30c. qt., \$1.75 pk., \$6.00 bush. of 20 lbs.

Grass Mixture for outlying grounds or "Fair Greens"—Price, \$2.50 bush of 14 lbs.

# Jenderson's

### What Our Customers Say:

#### IN MAINE.

I did not succeed in getting four tons or more per acre, but I did get more than from anything else, and it is splendid hay.—G. M. HOLMES.

#### IN NEW JERSEY.

The Special Grass Mixtures have been most successful, in spite of an unusually trying season. Yielded a crop of hay more than twice as great per acre as the timothy, which I source alongside at the same time.—R. V. LINDABURY.

#### IN IOWA.

Your Grass Mixture has done exceedingly well, especially in this year of drought. It yielded about twice as much as timothy, and cattle seemed to do better on it.—W. WATSON.

#### IN NEW YORK.

Your Permanent Mixture is the finest piece of grass anywhere about here. An old farmer told me last week it would cut 3½ tons to the acre sure.—J. M. RICHARDS.

#### IN VERMONT.

Your Grass Seeds are easily the best of any in the market.—F. C. Kimball.

#### IN PENNSYLVANIA.

The Permanent Pasture Grass was a perfect success. We never had such a good yield of gruss. We moved our meadows twice.

—WM. SIMPSON & SONS.

The green appearance of the field attracted universal attention. It has far surpassed clover and timothy in the amount it yields.

—J. B. Cummings.

#### IN VIRGINIA.

My manager is enthusiastic over your mixture for Hay and Permanent Pusture. He claims this year he cut 3 tons per acre the first cutting, 1½ tons the second, and will cut 2 tons the third. The field is a grand sight; people come for miles around to see it.—Edward E. Barney.

#### IN INDIANA.

Your Grass Seed produced the largest crop of hay I ever saw, and has yielded a most excellent pasture ever since, notwithstanding the extraordinary drought in this vicinity.—R. S. TAYLOR.

#### IN OHIO.

The Special Grass Mixture has given us the very best of satisfaction; if produced the finest piece of grass I ever sue and has given us a large amount of hay and pasture per acre—W. J. HAYES.

# Special Grass Mixtures

FOR HAY AND PERMANENT PASTURE.

#### WILL LAST TWENTY YEARS WITHOUT RENEWAL.

Consisting of the following varieties: Orchard Grass, Meadow Foxtail, Sheep's Fescue, Rhode Island or Creeping Bent, Hard Fescue, Sweet

Scented Vernal (True Perennial). Meadow Fescue, English Rye Grass, Italian Rye Grass, Red Top, etc., as recommended in our book "HOW THE FARM PAYS," blended in proportions which, we have found from actual use, give the most satisfactory results.

On ordinary fertile soil three bushels of this mixture is sufficient to seed an acre but where the land is poor a larger quantity will be necessary. one soil with another a fair average would be three bushels to the acre.

To these mixtures, intended for either Mowing Lands or Pasture on account of their greater weight should be sown separately), are to be added ten pounds of Mixed Clovers, comprising White, Mammoth, Perennial or Cow Grass, Alsike, Trefoil, etc., but these should only be sown in the spring, as they are rather tender in this latitude if sown in the fall.

OPINIONS OF THE PRESS.

Country Gentleman says: "Below the taller grasses was a thick mat of finer kinds, and the close, rich turf hid every particle of soil."

In the Press.

Country Gentleman says: "Below the taller grasses was a thick mat of finer kinds, and the close, rich turf hid every particle of soil."

In the Press.

Country Gentleman says: "Such mixtures are far superior to Timothy, or "Timothy and Clover," or any one grass, costing but a little more, insting nuch longer, and giving frequently more than double the yield."

Farm and Home says: "The enormous yield of nearly four and one-half tons of good hay per acre should convince any one that more hay and conditions the latter yielded less than a ton and a half per acre."

How the Farm Pays says: "Far in advance not only of Timothy but of any other Grass we have thus far in cultivation." cultivation.

> At our Farm one of these Mixtures yielded (first cutting. 5,888 lbs.; second cutting, 4,320 lbs. per acre) a total of 10,208 LBS. CURED HAY PER ACRE, while Timothy growing alongside under same conditions vielded only one cutting of 2,400 lbs. per acre.

# Henderson's "Recleaned" Grass Seeds

## Fall Sowing is the Most Successful.

Prices for Grass Seed are subject to fluctuations of the market. Those herein named are the prices ruling at this date (August), but we cannot be bound by them for any length of time. Write for prices.

Awnless Brome Grass. (Bromus Inermis) A new forage plant of the utmost importance particularly in dry and Southern sections; yields enormously. 18c. lb., \$15.00 100 lbs.

Bermuda. (Cynodon Dactylon) Valuable for Southern States, withstands the heat and drought, 80c. lb., \$70.00 100 lbs.

Creeping Bent Grass. (Agrostis Stolonifera.) Excellent for lawns, succeeds well in moist sits. About 2 bushels to the acre. (20 lbs. to bush.) 25c. lb., \$4.50 bush., \$22.00 100 lbs.

Crested Dog's Tail. (Cynosurus Cristatus.) Should enter in moderate quantity in permanent pasture mixtures and lawns. (About 21 lbs. to bush ) 40c. lb., \$7.50 bush., \$35.00 100 lbs.

nglish Rye Grass. (Lolium Perenne.) A valuable grass. 2½ to 3 bushels to the acre. (24 lbs. to bush.) 10c. lb., \$2.00 bush., \$700 100 lbs.

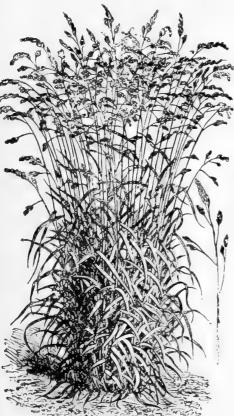

Fine Leaved Sheep's Fescue. (Festuca Ov.na Tenuifolia.) (About 14 lbs. to the bush.) 35c. lb., \$4.25 bush., \$28.00 100 lbs.

Hard Fescue. (Festuca Duriuscula.) Dwarf, hardy grass, of great value for dry situations, indicates superior quality in hay. (121bs. to bush.) 25c. lb., \$2.50 bush., \$18.00 100 lbs.

Hungarian Grass. (Panicum Germanicum.) Is a valuable annual forage plant. 1 bush. to the acre. (48 lbs. to the bush.) 10c. lb., \$1.10 bush., \$2.20 100 lbs.

Italian Rye Grass. (Lolium Italicum.) Unequaled for producing an abundance of early spring feed—giving quick and successive growths throughout the season. (18 lbs. to the bush.) 10c. lb., \$1.50 bush., \$8.00 100 lbs.

Johnson Grass. (Sorghum Halapense. (Of greatest importance for the South. Very tender and nutritious. 14c. lb., \$3.00 bush. of 25 lbs., \$11.00 100 lbs.

ORCHARD GRASS.

Kentucky Blue Grass. (Poa Pratensis.) Very valuable for a variety of soils from moist to dry, furnishes de-licious and luxuriant pasturage and makes excellent hay. (14 lbs. to bush.) Fancy or double extra clean. 15c. lb. \$1.60 bush., \$11.00 100 lbs.

MEADOW FOXTAIL.

Meadow Fescue. (Festuca Pratensis.) Of great value for permanent pasture and hay, robust grower and nutritious. (22 lbs. to the bush.) 18c. lb., \$3.75 bush., \$16.00 100 lbs.

leadow Foxtail. (Alopecurus Pratensis.) Resembles Timothy, but of much earlier and rapid growth, particularly valuable for permanent pastures and hay. (7 lbs. to bush.) (See Cut.) 30c. lb., \$2.00 bush., \$25.00 100 lbs. Meadow Foxtail.

Orchard Grass, (Dactylis Glomerata.) One of the most valuable of all grasses, for either grazing or mowing, of early, rapid and luxuriant growth. (See Cut.) (14 lbs. to bush.) \$2.25 bush., \$15.00 100 lbs.

Red or Creeping Fescue. (Festuca Rubra) Suitable for sandy seacoasts and dry soils. (About 14 lbs. to the bush.) 30c. lb., \$3.75 bush., \$25.00 100 lbs.

Red Top Grass. (Agrostis Vulgaris.) (14 lbs. to bush.) \$1.20 bush., \$8.00 100 lbs. Fancy recleaned silver seed. (32 lbs. to bush.) 18c. lb., \$5.25 bush., \$16.00 100 lbs.,

Rhode Island Bent Grass. (Agrostis Canina.) A very fine variety for lawns. About 3 bush, to the acre. (Bush, of 14 lbs.) 35c. lb., \$4.25 bush., \$30.00 100 lbs.

Rough Stalked Meadow Grass. (Poa Trivialis.) Valuable for pastures and meadows, particularly on damp soils. 11/4 bush. to the acre. (About 14 lbs. to the bush.) 45c. lb., \$6.00 bush., \$40.00 100 lbs.

Sheep's Fescue. (Festuca Ovina.) Excellent for uplands and dry pastures, of close, dense and nutritive growth, relished by sheep. (12 lbs. to bush.) 25c. lb., \$2.50 bush., \$18.00 100 lbs.

Sweet Vernal Grass, True Perennial. (Anthoxanthum Odoratum.) Very aromatic, giving hay a fine flavor. (10 lbs. to bush.) 70c. lb., \$6.50 bush.

Tall Meadow Fescue. (Festuca Elatior.) Very early, nutritive and productive. Valuable on wet or clay soils. (About 14 lbs. to the bush.) 30c. lb., \$3.75 bush.

Tall Meadow Oat Grass. (Avena Elatior.) Recommended for soiling, being rapid and luxuriant in its growth. 4 to 5 bush. per acre. (Bush. of 10 lbs.) 25c. lb., \$2.00 bush., \$18.00 100 lbs.

Timothy. (Phleum Pratense.) We offer a particularly "choice" sample. ½ bush. per acre. (45 lbs. to bush.) \$2.00 bush., \$4.45 100 lbs. Price variable.

Various Leaved Fescue. (Festuca Heterophylla.) 30c. lb., \$3.50 bush. of 14 lbs.

Wood Meadow Grass. (Poa Nemoralis.) Of early growth, and thriving well under trees. 2 bush. to the acre. (About 14 lbs. to the bush.) 40c. lb., \$5.00 bush.

Yellow Oat Grass "True." (Avena Flavescens.) Good meadows. (About 7 lbs. to the bush.) \$1.25 lb., \$8.50 bush. Good for dry pastures and

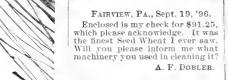

## WINTER WHEAT.

Prices are subject to the fluctuations of the market. The prices herein named are those ruling at this date (August), for the new crop 1900. Delivery f. o, b. New York.

Special quotations to large buyers.

#### RURAL NEW YORKER, No. 57.

Has heavily bearded heads which are beautifully symmetrical, being pointed at the tip, broad in the middle and tapering towards the stem. The straw is unusually tall and strong and stools freely, frequently having 35 to 40 stalks from a single grain. The heads are compact, averaging three kernels to a spikelet or "breast," and ten breasts to a side. The kernels are of medium size and of an attractive color, between the so-called "red" and amber. Possessing the requisite degree of hardness for the production of the finest grade of flour, it will be much sought after by millers. The chaff is clear white, with a trace of velvet sufficient to make it difficult for the green fly to attack it, and the heads do not mildew as the full velvet chaff varieties are liable to do. (See cut.) 75c. peck, \$2.25 bushel; 10-bushel lots, \$2.00 bushel.

NEW YORKER, No. 6.

**RURAL** 

This beardless variety is a hybrid between Rye and Armstrong Wheat, though apparently all traces of Rye have disappeared and it now appears a handsome, beardless Wheat. It succeeds and produces heavy crops on poor thin land, where Wheat could not be successfully or profitably grown, and it also has extended the whon five when the successfully distributed to the successfully of the successfully or profitably grown, and it also has extended the successfully of the successfully distributed the successfully of the successfully distributed the successful the s

treme hardiness to recommend it. When first raised, some years ago, the top of the culms was downy with Rye culms. This characteristic could not be fixed, so that for this variety the culms having no down were alone selected. The gold-colored straw is very thick and strong, easily supporting the heavy grain without breaking. The large amber kernels are placed four to a breast, eight breasts to a side, with long symmetrical heads having a brown chaff. (See cut.) 75c. peck, \$2.25 bushel; 10-bushel lots, \$2.00 per bushel.

## PEDIGREE GIANT (Half-bearded).

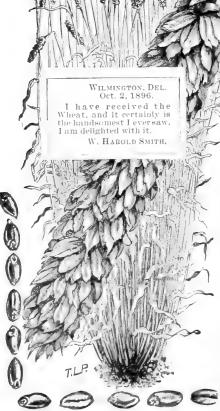

RURAL

NEW YORKER, NO. 57.

Those who grew the Early Genesee Giant Wheat which we offered a few years ago will no doubt remember what a grand wheat that was until it ran out. The Pedigree Giant is a cross obtained from the old Genesee Giant, and has in a marked degree all the desirable features of that variety when at its best. The head is of peculiar construction with very full centre row, and the whole head is crowded with fine hard amber grain.

It is a champion in productiveness, and no variety can outyield it. It is a wonder for thrifty fall growth, is early and strong stooling, has strong short-jointed straw, which stands up well under high culture. 75c. peek, \$2.25 bushel; 10-bushel lots, \$2.00 bushel.

RURAL NEW YORKER, NO. G.

#### WINTER WHEAT-CONTINUED.

Pride of Genesee (Bearded).—One of the most productive varieties, having a long, well-filled head, and the fact that it will give a reasonably good crop on land so poor that common sorts would be a failure, cannot fail to make it a popular sort, as the head does not decrease in proportion to the straw, being large and well filled on a very short, light growth of straw. 75c. peck, \$2.25 bushel; 10-bushel lots, \$2.00 bushel.

Diamond Grit, or Winter Saskatchewan (Bearded).—A worthy rival at last to the Hard Spring of the Northwest, being superior to every known winter wheat for milling. With this grand seedling in general cultivation the winter wheat sections can compete with the finest grade of flour known, with the advantage of making more flour to the bushel than any other wheat as yet grown. This, with its wonderful productiveness, strong, wiry straw and sturdy growth, with extreme hardiness, cannot fail to make it a leader wherever given a trial. Straw is of medium height, thick-walled and wiry, of a light yellow color. Heads of medium length and carried nearly erect. 75c. peck, \$2.25 bushel; 10-bushel lots, \$2.00 bushel.

Fortyfold (Bald). Was first brought to our notice by one of the largest Wheat growers of Pennsylvania, who claimed it to be the best yielder among all the varieties he has grown. It is of very vigorous growth, remarkably hardy and stands severe winters and dry weather better than any other variety. It has very stiff straw and a large handsome white grain. It does well on all kinds of soil and is therefore a very safe variety to grow. 75c. peck, \$2.25 bushel; 10-bushel lots, \$2.00 bushel.

Bearded Winter Fife.—A grand new bearded Wheat, which has all the splendid milling qualities of the celebrated Winter Fife, and is even hardier and more flinty in the grain. It is one of the earliest wheats, ripening along with the Early Red Clawson, and is a very strong, healthy grower, stooling rapidly in the fall. It starts early in spring, and is among the first to head. Straw is strong and above the medium height. The heads are long and wide, with white velvety chaff. The grain is large, medium long and plump, and of a clear light amber shade. The bran is exceptionally thin, hence it will make more flour than almost any other sort grown. 75c. peck, \$2.00 bushel; 10-bushel lots, \$1.85 bushel.

Gold Coin (Bald).—A very productive variety which in New York State has yielded over 60 bushels per acre and even on large acreages has seldom run under 40 bushels per acre. The grain is white, the head long and well filled, frequently having five kernels abreast. The straw is strong and stiff, and will not lodge on the richest land. 75c. peck, \$2.00 bushel; 10-bushel lots, \$1.85 bushel.

#### WHEAT BY MAIL, POSTPAID,

For the benefit of our customers living at a distance from Railroads and Express Offices who would like to try our new Wheats, we offer them in small lots, postpaid by mail, at the following prices:

Rural New Yorker, No. 6	.75 mail	
" No. 57	.75	101 \$3.00
Gold Com	.75 )	Postpaid.

#### OATS.

Winter.—The stock of Winter Oats we offer is remarkably hardy, having been grown for some years past in Northern Pennsylvania, and are incomparably superior to the ordinary winter or turf oats of Virginia and the South. They are thoroughly acclimated and may be grown even north of New York City with safety. Sown in September they stool out remarkably and require but one and one-half bushels per acre. They have stiff straw, stand up well and are much more productive than spring oats. In spring if they appear to be frozen out, just wait, the roots are there underneath the surface and grow rapidly when spring really sets in. 50c. peck, \$1.10 bushel; 10 bushels and upwards, \$1.00 bushel.

#### -RYE.

Winter.—The variety most commonly cultivated. \$1.10 bushel; 10-bushel lots, \$1.00 bushel.

Excelsior Winter.—A new variety from Vermont, that has never failed to yield at the rate of 40 to 50 bushels per acre. With the originator, a four-acre field yielded 52 bushels to the acre. \$1.50 bushel; 10-bushel lots, \$1.40 bushel.

Thousandfold.—Said to be the most productive Rye in cultivation. \$1.50 bushel; 10 bushel lots, \$1.40 bushel.

Giant Winter.—Unquestionably the heaviest cropping Rye in existence, having in fair tests outyielded all other varieties both in straw and grain. The heads average six to eight inches in length and are filled from end to end with large, plump, heavy grains. The straw is giant in length and strength and of extraordinary stiffness, resisting severe wind and rain storms to a remarkable degree without lodging. (See cut.) \$1.75 bushel; 10-bushel lots, \$1.60 bushel.

## SAND, OR WINTER VETCH

(Vicia Villosa.)

It is the earliest crop for cutting or plowing under in spring, being nearly a month earlier than Scarlet Clover and much hardier.

Though it succeeds and produces good crops on poor, sandy soils, it is much more vigorous on good land and grows to a height of 4 to 5 feet. It is perfectly hardy throughout the United States, remaining green all winter, and should be sown during August and September, mixed with Rye, which serves as a support for the plants.

It is exceedingly nutritious and may be fed with safety to all kinds of stock.

It is of such early and rapid growth that a full crop can be taken off in time for planting spring crops.

Sow one-half bushel to a bushel per acre with one-half bushel of Rye or Wheat. 10c. 1b., \$1.25 pk., \$4.00 bushel of 60 lbs., \$6.00 per 100 lbs.

## TRUE DWARF ESSEX RAPE.

In the United States we have millions of acres of good land that annually lie idle or run to weeds the latter part of the season, after the grain, potato and hay crops have been harvested, a large portion of which might be made to produce one of the finest feeds imaginable and in the greatest abundance, at a time when cattle and sheep are roaming through bare pastures in search of a scanty living. Under favorable conditions it is ready for pasturing sheep or cattle within six weeks from time of sowing, and on an average one acre will carry twelve to fifteen sheep six weeks to two months. When on the rape they should at all times have access to salt; but water is not necessary. There are several varieties of Rape, but care should be taken to pro-

# CRIMSON OR **SCARLET** CLOVER. .

(Trifolium incarnatum.)

The most valuable Plant for Restoring the Fertility of Worn-out Soils.

The value of Scarlet Clover is now so thoroughly established that we have no hesitation in recommending that all lands from which crops have been harvested during the summer and fall should be sown with Scarlet Clover for plowing under the following spring. Authorities who have made a care

ful estimate state that plowing under a good crop of Scarlet Clover is equivalent to 20 tons of stable manure per acre, and even if the Clover be harvested or pastured, the benefits derived from the wonderful nitrogenous root formation will alone many times repay the cost of seed and labor.

If intended for feeding, it should always be cut while in the young stage and never fed to stock after the crop has ceased flowering, as serious results are apt to follow the feeding of overripe Crimson Clover.

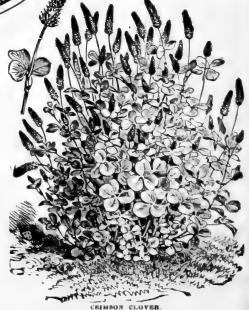

It is the cheapest source of nitrogen, and has revolutionized the methods of farming in New Jersey, Maryland and Delaware, has restored to profitable cultivation thousands of acres of poor land, and should be extensively used throughout the entire Eastern States for sowing among corn, tomatoes, turnips, etc., at time of last hoeing, or after potatoes, melons, cucumbers, etc., have been harvested or on grain stubble and harrowed in. Its value as a winter soil mulch and for green manuring for orchards cannot be overestimated, as it provides nitrogen in the best form and quantities, where an application of fertilizers or barnyard manure may act too strongly, producing foliage at the expense of fruit.

In the latitude of New York, time for sowing may extend from July 15th to September 15th, and further South up to October. The seed needs to be only lightly covered, and a good plan is to sow on fresh plowing and cover with a light harrow. Sow 15 lbs. per acre.

Choice American-grown new crop seed, thoroughly recleaned and free from weed seeds, I 2c. Ib., \$6.50 bush., \$10.50 per I 00 lbs.

should not be sown in the Southern States until September or October for winter pasture. In the latitude of New York, July or August is the best time to sow. Its fattening properties are probably twice as good as those of clover. At the Michigan Experiment Station, 128 lambs were pastured for eight weeks on 15 acres of Rape sown in July, and showed a gain of 2,890 lbs., or at the rate of 3 lbs. per lamb each week. Sow 6 lbs. per acre broadcast, 2 to 3 lbs. per acre in drills. 10c. lb., \$3.50 bush., \$7.00 per

#### Henderson's Prepared Potting Soil.

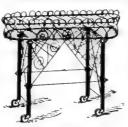

ONE of the principal elements of success in the growing and flowering of plants and bulbs is proper soil. It is so often difficult for amateurs to procure the right kind of potting soil that we have concluded to furnish it to our customers at practically cost to us, including packing. It will be the same that we use in our extensive green-houses. It is composed of sod and rotted mannouses. It is composed of sort and rotted man-ure, thoroughly turned and mixed several times during the year it takes to prepare it, when it is considered it to use. As needed we mix with it peat, sand and pure raw ground bone meal—it is then friable, rich, and will cause plants to grow and bloom luxuriantly.

PRICE, 25c. per peck hag, 75c. per bushel hag, \$2.00 per barrel (purchaser to pay freight).

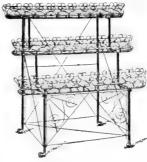

with potting soil.....

REVOLVING ADJUSTABLE STAND.

SMALL SINGLE SHELF STAND.

Wire Plant Stands. SQUARE STAND, WITHOUT TRELLIS.

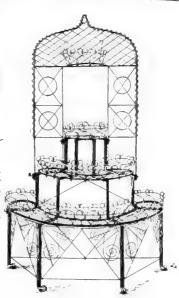

These "knock down" for shipment, and consequently reach their destination in perfect condition. They are very strong and steady, and are handsomely finished in green enamel and gold.

LARGE "HALP CIRCLE" STAND .- 45 ins. wide, 28 ins. deep, 42 ins. high, or with trellis, 72 ins. high. **Price**, without trellis, \$8.00. With trellis, \$9.50.

SMALL "HALF CIRCLE" STAND .- 42 ins. wide, 26 ins. deep, 42 ins. high, or with trellis, 67 ins. high. Price, without trellis, \$7.00. With trellis, \$8.50

THREE SHELF SQUARE STAND.—41 ins. long, 25 ins. deep, 42 ins. high, or with trellis, 75 ins. high. Price, without trellis, \$8.00. With trellis, \$9.50.

TWO SHELF SQUARE STAND .- 34 ins. long, 17 ins. deep, 32 ins. high, or with trellis, 60 ins. high. Price, without trellis, \$5.00. With trellis, \$6.50. SMAIL SHELF SQUARE STAND.—28 ins. long, 10 ins. deep, 22 ins. high. Price, \$4.00.

HALF CIRCLE STAND, WITH TRELLIS.

#### REVOLVING ADJUSTABLE PLANT STAND.

No. 2.—Has two tiers of brackets and holds 17 pots. Diameter, 26 ins.; height, 4 feet; weight, about 25 lbs.

Price, \$6.00
No. 3.—(See cut.) Has three tiers of brackets and holds 23 pots. Diameter, 32 ins.; height, 5 feet; weight, 35 lbs.

WATERPROOF SAUCER

These are made of strong burlap bagging, warmly lined with waste wool and cotton, which is quilted in to hold position. They are excellent substitutes for straw mats, being, if anything warmer than straw, more easily handled, less bulky, and they do not harbor mice or other vermin. We were afraid that they would hold moisture and either rot or mildew, but our trial for two winters proves them to be far more durable than straw mats. PR CES: Size A, 4xx76 ins., 8c. each, \$9.00 per doz.; Size B, 76x76 ins., \$1.15 each, \$12.00 per doz.

#### "WATERPROOF DUCK" MATS.

These are filled with cotton and wool waste, and quilted the same as the "Buriap" mats described above. The "waterproofed dick" cotton cloth on one side sheds water, and prevents them from getting "soaked cloth on one through. PRICES: Size C, 40x76 ins., \$1.50 each, \$15.00 per doz.; Size D, 76x76 ins., \$1.75 each. \$18.00 per doz.

#### RYE STRAW MATS.

Being made in the best manner of long rye straw and best tarred cord, they are invaluable for throwing over cold frames, hot beds, etc., during the coldest weather; they rol up and can be stowed in small space. PRICES:
Size, 3x6 feet, \$1.00 each, \$11.00 per doz.; Size, 6x6 feet, \$1.75 each; \$20.00 per dozen.

#### MASTICA.

For glazing Greenhouses, Sashes, etc., new and old. It is elastic, advicesive and easily applied. It is not affected by dampness, heat or cold. Every florist has experienced difficulty in obtaining putty (whether ordinary or white lead) for glazi...g that is satisfactory for any length of time. The fact is, putty is not adapted for greenhouse work. "Mastica" is The fact is, putty is not adapted for greenhouse work. "Mastica" is elastic and tenacious, admitting of expansion

sash, as it makes it perfectly tight and saves the expense of relaying the glass. One gallon is sufficient for about

300 lineal feet, used either for bedding or over glazing. PRICES for Mastica soft, for machine application, 50c. per quart, 85c per gallon. Mastica Glazing Machine, \$1.25 each. per quart, 85c per 1/2 gallon, \$1.50

#### THE LAWN AND GARDEN HAND-CART.

A most convenient cart. Is far superior to any wheelbarrow for all kinds of work.

Having two wheels, it is self-supporting when in motion, and the operator does not have to hold it from turning over sidewise.

It has large wheels, 32 inches in diameter, which are placed well under the box, so that the wheels carry nearly all of the load instead of the man carrying about one-half of it. Box is 3 feet to inches long, 21 inches wide Inside bottom, and 15 inches deep.

The wheels being high, is can be handled in soft ground or mud and

pushed or pulled over obstruction

Price, \$8.50.

# Sash, Hot-Bed Frames and Cold Pits.

#### MARKET GARDENERS' AND FLORISTS' SASH.

We carry a large stock, so that we can fill almost any order on receipt. Unglazed: 3x6 feet, for 6x8 inch glass, of best cypress 90c. each, \$10.00 per doz., \$75.00 per 100. This is the regulation sash for hot beds and per doz., \$75.00 per 100. This is the regulation sast cold frames, and we sell thousands of them every year.

#### EXTRA FINE SASH FOR PRIVATE PLACES.

Made from 'red gulf' cypress, finished edges, with neat iron cross-

piece running through the centre; painted one coat.

Unglazed: 3x6 feet, requiring three rows of £x10-inch glass, \$1.10 €ach, \$12.00 per doz. Glazed: 3x6 feet, with three rows of &xr0-inch glass, painted two coats white, \$3.00 €ach, \$35.00 per doz.

For shipping, glazed sash has to be carefully crated. This will extra, 50c. per crate. Up to b, glazed sash can be put in a crate. This will sest

#### COLD FRAMES AND HOT BEDS.

Made of best cypress lumber, planed and painted two coats. The corners join by bolding on angle irons. The rails between the sash are rabbeted for the sash, grooved for drip and dove-tailed into the sides. Strong, durable and portable. Can be taken down for convenient storage when not in use; 8 inches deep in front, 16 inches deep at back.

Prices do not include sash (for prices of sash, see above.)

No. 2. Barrel 14 in. long; diam. 15-16 in.; 1 coarse and 1 fine spray and 1 steam rose \$4.00.

No. 10. Bar-rel, 18 in. long; d I fine spray and I steam rose with patent valves, and with elbow joint for sprinkling under the foliage, \$6.00.

CONTSC

No. 11. Same as No. 10, without patent valves with elbow joint, \$5.00.

No. C. Barrel
16 in. x 1½ in. diameter; 1 s pra y
and 1 stream rose, side attachment and ellow joint for sprinkling under foliage, \$4.50.

#### Woodason's Fluid and Powder Bellows

are not the cheapest, but are thoroughly good and made for wear.

## Woodason's Double Cone Powder Bellows.

For Dusting Plants with Dry Powders for Insects and Fungus.

This bellows can be held in any direction without wasting powder, as it regulates its own supply, and it does not clog up. The best article ever invented for destroying insects in the conservatory, garden, orchard or folds in the transfer of the conservatory. invested for destroying insects in the conservatory, galaxi, order the leaves as well as on top, in an hour. (See cut.) Price, \$2.75.

#### Woodason's Single Cone Powder Bellows.

Price, large size, \$1.75. Small size (for conservatory and house use),

#### Woodason's Fluid Vaporizing Bellows.

For Spraying Plants with Fluid Decoctions for Insects and Fungus.

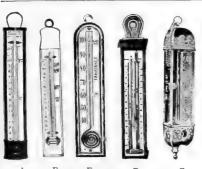

'HENDERSON" THE HAND BUCKET PUMP.

This throws a spray as fine as mist, rendering the use of strong solutions perfectly safe on tender foliaged plants; it forces the fluid into every crevue, without using half the quantity required by syringe or sprinkler. (See cut)

Price, large size, \$2.00 Small size (for house) use), \$1.25.

#### "HE "HENDERSON" . . . HAND BUCKET PUMP.

This is the best and most durable portable nand pump in the market. Working parts are nand pump in the market. Working parts are made of solid brass with large air chamter, and is double acting throwing an absolutely continuous stream, either solid or in a fine spray, as desired; very light and easily carried, and works from any bucket or tub. Just the thing for throwing liquid insecticides and fingicides on low trees, shrubs, plants, etc. and by altering the nozzle it can be used for washing carriages windows, etc. (See cut.) Price, \$3.75; or, with extra 7 feet section of hose and pole connection for tree spraying. for tree spraying. \$4.75.

#### HENDERSON'S SUPERIOR FERTILIZER FOR HOUSE PLANTS.

A safe, clean and high-grade fertilizer, free from disagreeable odor, prepared A safe, clean and high-grade fertilizer, free from disagreeable odor, prepared especially for feeding plants grown in pots. It is a wonderful invigorator, producing luxuriant, healthy growth, foliage of rich texture and larger and more brilliant flowers of improved substance. It contains in a highly concentrated form all of the ingredients of plant food essential to the highest development of plants and flowers. It is very soluble and is readily assimilated, so that marked improvement is usually noticed in ten days' time. It is fine and dry, clean and easy to apply, either sprinkled over the surface of the as a top-dressing, or dissolved in water (stirring well). Detailed directions on each package.

For Cut Flowers, a pinch of this fertilizer in the water will keep it sweet and wholesome, and preserve the flowers from one to three days longer, if half an inch of the stems is cut off daily, which removes the callus which forms over the cut ends and allows the flower above to absorb the invigorating liquid.

ends and allows the flower above to absorb the invigorating liquid.

By PETER HENDERSON. 375 Pages. Fully Illustrated. Price, post-paid, \$1.50.

F you wish to grow Vegetables for Sale, read GARDENING FOR PROFIT. The personal success of Fyon wish to grow Vegetables for Sale, read Gardening for Profit. The personal success of its author during his long career as a market gardener, and the success of thousands from the time he first made his cultural methods known up to the present day, shows the popular estimation of the value set upon this great work. All over the land it opened up the market gardening interest, for it should be always remembered that this was the first work ever written on market gardening in this country. To the South alone its value is almost beyond computation, for the enormous trucking interests already there, and which are constantly on the increase owe their birth entirely to, and subsequent development mainly to the teachings of Gardening For Profit. Written particularly for the Market Gardener and Truck Farmer, yet it is of equal value for large private gardens. The first edition of Gardening For Profit. Written particularly for the Market Gardener and Truck Farmer, yet it is of equal value for large private gardens. The first edition of Gardening For Profit. Written particularly for the Market Gardener and Truck Farmer, wet it is of equal value for large private gardens. The first edition of Gardening For Profit. The present edition was revised and greatly enlarged in the summer of 1886. Its scope has been greatly veryed, so that what is now advised to plant are kinds in general use at this time.

been carefully revised; so that what is now advised to plant are kinds in general use at this time.

CONTENTS. The Forcing of all important Vegetables and Fruits under Glass—The Men Fitted for the Business—The Amount of Capital required and Working Force per Acre—Profits of Market Gardening—Location, Situation and Laying Out—Soils, Drainage and Preparation—Manures—The Uses and Management of Cold Frames—Protecting Cloth in lieu of Sashes—Spring Raising of Cabbage, Caulfower and Lettuce—Formation and Management of Hot-Beds—Forcing Pits or

Greenhouses—Wide Greenhouses for Vegetable Crops—Forcing Strawberries—Seeds and Seed Raising—How, When and Where to Sow Seeds—Transplanting—Vegetables, their Varieties and Cultivation—When to Sow and Plant in the Southern States—Packing of Vegetables for Shipping—Preservation of Vegetables in Winter—Insects—Culture of Small Fruits—Monthly Calendar of Open

F you wish to become a Commercial Florist, then of all books you should procure

\_\_\_

Practical Floricy. The have any number of complimentary letters from people who actually knew nothing of the florists' business, but who followed the instructions in this work and are now "full-fledged florists." And although written especially for the Commercial Florist, it is equally valuable to the amateur and all having conservatories, greenhouses, window gardens, etc. Practical Floricy trues was first issued in 1868, has gone through many editions and had an enormous sale, and is admitted to be the leading American authority on this subject. This present edition of Practical Floricy trues was greatly enlarged by Mr. Henderson in 1887, and revised to keep abreast of the times, as there are now many superior methods of propagation and culture of flowers and plants—and many improved varieties of plants—all of which have been fully treated in this new edition.

CONTENTS.

How to become a Florist—The Profits of Floriculture—Aspect and Soil—The Preparation for New and the Renovation of Old Lawns—Laying out the Flower Garden—Designs for Ornamental Grounds and Flower Garden—Planting of Flower Beds—Soils for Potting—Temperature and Moisture—The Potting of Flower Beds—Soils for Potting—Temperature and Moisture—The Potting of Flants—Drainage in Pots—Cold Frames for Winter Protection—Construction of Hot-Beds—Greenhouse Structures—Glass, Glazing and Shading—Modes of Henting—Propagation of Plants by Seeds—Propagating Roses by Grafting and Budding—Greenhouse Plants most in demand in

Spring—Cold Frame Plants most sold in Spring—Plants most in demand for Window Decoration in Winter—Culture of Winter-flowering Plants for Cut Flowers—Rose Growing in Winter—Bulls for Winter Flow is—Plants used for Decoration of Rooms—Construction of Bouquets, etc.—Hanging Baskets—Parlor or Window Gardening—Formation of Rockwork and Plants for Rocks—What Flowers will grow in the Shade—Succession Crops in the Greenhouse—Packing Plants—Plants by Muil—Insects and Discases Aft cting Plants—Mildew—Diary of Operations for the Year—The Culture of Foreign Grape Vines under Glass.

By PETER HENDERSON. 404 Pages. Fully Illustrated. Price, post-paid, \$1.50.

7AS written to meet the wants of those desiring information on gardening for private use. Its scope therefore embraces directions for the culture and propagation of Flowers, Vegetables and Fruits. It has had a large sale, and gone through several editions, the present having been revised and greatly enlarged by the author in 1888; it exhaustively treats on the Vegetable Garden, Flower Garden, Fruit Garden, Greenhouse, Grapery, Window Garden, Lawn, the Water Garden, etc.

CONTENTS.

Preparation of the Ground-Walks-The Lawn-Design for Gardens-Planting of Lawn and Flower Bods-Fall or Hol-land Bulbs, etc. -Propagation of Plants by Seets-Propaga-of Plants by Cuttings-How Grafting and Budding are Done-The Potting lants-Winter flowering Placts.-Plants suited for Summer Decoration-low Gardening-Culture of Water Lilies and other Aquatic Plants-The

Chrysanthemum—Parlor Gardening or the Cultivation of Plants in Rooms—Greenhouses attached to Dwellings—Detached Greenhouses, Modes of Heating, etc.—Greenhouses and Pits without Artificial Heating—Flowers that will grow in the Shade—Insects and other Parasites minrous to Plants—Humburstin Horticulture—Hardy Grapes—The Cold Grapery—The Hot-house or Forcing Grapery—The Strawberry—The Vegetable Garden—Monthly Calendar of Operations.

By PETER HENDERSON. 526 Pages. Profusely Illustrated. Price, post-paid, \$3.00.

THE original HANDBOOK OF PLANTS was issued in 1881; in this new edition, rewritten and enlarged, Issued 1890, all the new genera of importance are added. All botanical terms are given, and also a very full list of popular names, and all the generic names are accentuated. The natural system of arrangement is adopted in the descriptions instead of the Linnæan or artificial system; and a carefully compiled glossary of the technical terms used in describing plants. A monthly calendar of operations for the greenhouse and window garden, flower, fruit and kitchen garden, will undoubtedly render this edition valuable as a book of reference. Very full instructions are given for the culture and forcing of all Fruits Flowers and Vegetables of importance; in short, there is sufficient matter given on all gardening subjects to allow this book to be termed **The American Gardener's Dictionary**. And it will be better adapted

to the wants of American hortfculturists than any of the more costly foreign works on gardening; for, though from a foreign standpoint these are all they claim to be, yet for our American climate much of the information, and especially the gardening instructions, are not only useless, but actually misleading.

CONTENTS

About 5,000 genera of plants, alphabetically arranged, with their descriptions, individual histories, usefulness, hardiness, requirements, etc., and, where their importance justifies it, cultural instructions are given—Local, Popular or Common Names—Correct Pronunciation—Cultivation of principal Vegetables, Fruits and Flowers—Winter Forcing of Roses, Bulbs and other Plants used for Cut Flowers—Winter Forcing of Vegetables and Fruits—Monthly Calendar of Garden Operations.

Annuals, Redding and Bordens, Paragets, Budding Cultivation of Control of

Garden Operations, Annuals, Bedding and Borders, Bouquets, Budding, Cold Frames and Pits, Color in Flowers, Conservatory, Designs, Draining, Fertilizers, Fountains, Frozer Plants, Glass and Glazing, Grafting, Grasses, Greenhouse, Hanging Baskets Heating, Hedges, Herbaceous Plants, Herbarium, Hybridization, In-

sects and Insecticides, Lawn, Manures, Mulching, Moles, Orchard, Orchid Culture, Ornamental Planting, Parlor Gardening, Plant Protection, Plants in Rooms, Plants for Shady Places, Plants for Seaside, Polsonous or Unhealthy Planta, Potting, Propagation by Cuttings, Layers, Seeds, etc., Pruning, Rock Garden and Rock Work, Rotation of Crops, Sereens, Seeds, Shading, Soll, Subsolling, Sub-tropical Garden, Temperature, Transplanting, Trenching, Vasse Ventilating, Waks, Wardian Cases, Waterfalls, Watering, Water Lilies and Water Plants, Weeds, Wintering Plants.

Useful Tables and Memoranda on Temperature, Rain, Soil, Manures, Numbers of Plants and Trees to an Acre; Quantity of Seeds required per Acre; for a certain number of Plants; to a given length of Drill, etc.

By PETER HENDERSON and WM. CROZIER. 400 Pages. Profusely Illustrated. Price, post-paid, \$2.00.

N acknowledged authority for Farmers. Gives all of the Latest Methods of Growing Grass, Grain, Root Crops, Fruits, etc.; and all about Stock, Farm Machinery, etc., etc. It is written in a plain and easy-to-be-understood language. Everything pertaining to scientific or abstruse subjects has been ignored, the information given being the most direct to make the work of the farm pay, which the so-called scientific farmer rarely does. This is perhaps the first book of the kind ever written by two men while actually engaged in the work which, to both, has been such a continued success—hence, their advice is practical and doubly valuable.

CONTENTS.

Training for the Business of Farming—Agricultural College Education—Selection of Soils—Farm Roads—Draining—Manures and the Modes of Application—Special Fertilizers—Green Manuring—Fertilizing by Feeding—Plowing, Harrowing, Cultivating and Rolling Land—Use of the Feet in Sowing and Planting—Rotation of Crops—Crops for Soiling and Fodder—Abortion in Cows—Grass and the Management—Varieties of Grasses—Mixed Grasses for Pasture and Hay—Cutting and Soiling and Fodder—Robotion in Cows—Grass and Company of the Company o and Curing of Hay-Clover Hay-Ensilage-Ensilage Compared with Roots

Live Stock of the Farm—Cows for the Dairy—Feed and Care for Milk and Butter
—Young Cattle and their Care—Management of the Dairy—Farm Horses—Sheep
—Swine—Farm Buildings—Fences—Rearing and Keeping Poultry—Pests of the
Farm and their Remedies—Farm Machinery—Plows—Harrows—Cultivators—
Mowers and Reapers—Haying Machinery—Fodder Cutters—Carts—Farm Culture
of Vegetables and Fruits—Cabbage—Celery—Sweet Corn—Cucumbers for Pickles
—Melons as a Market Crop—Onions—Culture of Small Fruits.

Popular Bulbs—Window Gardening—Plants in Rooms
—Propagation of Plants by Cuttings—Layers, Divisions
and Seed—Rose Growing in Winter—Greenhouse Structures and Heating—Formatton and Renovation of Lawns—Onion Growing for Market—How to Grow
